COUNTERWEIGHT FOR USE ON CABLE SUSPENDED FLOAT SWITCHES

This counterweight is used to set or adjust the pivot point for a cable suspended float switch. The position on the cable relative to the switch can be used to adjust the liquid level differential between open and closed switch output.

Most of the cable suspended float switches are supplied with these counterweights but the LITTLE-EX series of ATEX approved switches are not.

NOTE: The CWM must not be used in ATEX applications.

Features

- Adjustable cable pivot point
- Cable lock feature

INSTALLATION OF COUNTERWEIGHT ON CABLE

Feed the cable through the counter weight body.

Once in position, fully tighten top and bottom gland nut to secure counterweight to cable.

Caution: Do not over tighten.

Sensata Technologies, Inc. ("Sensata") data sheets are solely intended to assist designers ("Buyers") who are developing systems that incorporate Sensata products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products. Sensata data sheets have been created using standard laboratory conditions and engineering practices. Sensata has not conducted any testing other than that specifically described in the published documentation for a particular data sheet. Sensata may make corrections, enhancements, improvements and other changes to its data sheets or components without notice.

Buyers are authorized to use Sensata data sheets with the Sensata component(s) identified in each particular data sheet.
