

SC-ISOCON3

3 Port Isolating Signal Converter

The new SC-ISOCON3 Isolating Signal Converter can accept a wide range of inputs including 4-20mA, thermocouple, RTD and voltage signals. The units produce a high level DC output of either voltage or current.

Full 3 port isolation is standard as is an isolated transmitter supply which can be used to power any standard 2-wire 4-20mA transmitter.

The input type and range can be user selected using simple DIL switches inside the unit. All RTD and Thermocouple inputs can be fully linearised.

Non-interactive zero and span controls make adjustment of the unit quick and simple.

Other features include optional inversion of the input signal and optional second analogue output (see SC-Dualcon data sheet).

The unit can accept a wide ranging ac power supply from 90 to 264 Vac.

For specials such as custom linearisation, frequency input and maths functions etc please contact the sales office.

Notes

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur. Device is protected against reverse polarity connection.

Accuracy figures based on 24Vdc supply, 4-20mA output with 250Ω load and an ambient 20°C. SC-ISOCON3 does NOT provide safety isolation when the input is connected to the mains.
