

GP2A231LRSAF GP2A230LRS0F GP2A230LRSAF

Snap-in type
Detecting Distance: 1 to 9mm
*OPIC Output,
Reflective Photointerrupter with
Connector

Description

GP2A230LRS0F Series are standard, OPIC output, reflective photointerrupters with emitter and detector facing the same direction in a molding that provides non-contact sensing. This family of devices uses light modulation to reduce the affects of disturbing light, and the sensor is optimized to work in the selected focal distance. A 3-pin connector is included to allow remotemount or off-board designs.

■ Features

- 1. Reflective with OPIC Light Modulated Output
- 2. Highlights:
 - · Position pin to prevent mis-alignment.
 - Snap-mount positioning hooks

(GP2A230LRSAF, GP2A231LRSAF)

- Includes additional screw fixing holes (GP2A230LRS0F)
- · Short focal distance
- 3. Key Parameters:
 - Detecting distance: 1 to 9mm (White paper)

3 to 7mm (Black paper)

- · Undetecting distance : over 27mm (White paper)
- Connector : GP2A230LRSAF ; Tyco Electronics AMP K.K.

(PN: 292133-3)

GP2A230LRS0F; Tyco Electronics AMP K.K.

(PN: 292133-3)

GP2A231LRSAF; Japan Molex K.K.

(PN: 53401-0335)

4. RoHS directive compliant

■ Agency approvals/Compliance

1. Compliant with RoHS directive

■Applications

- General purpose detection of paper presence or motion.
- 2. Example: PPC, FAX, Printer

1

Notice The content of data sheet is subject to change without prior notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

^{* &}quot;OPIC"(Optical IC) is a trademark of the SHARP Corporation. An OPIC consists of a light-detecting element and a signal-processing

■ Design Considerations

Design guide

1) This product operates the light emitter by pulse drive. Please supply the stable supply voltage in order to prevent error operation by pulse current.

Please use this device after connecting a capacitor between V_O and GND for prevention of line noise.

2) Prevention of detection error

Please be careful that you need to keep the direct inverter light away from the photo detecting surface since the device will not operate correctly in such case.

In addition, we recommend to make sure the operation test in the actual application.

3) Plugging in/out

The connector should be plugged in/out at normal temperature.

This product is not designed against irradiation and incorporates non-coherent IRED.

Recommended Installation Hole drawing

- 1) We recommend to fix the product at punching side on the fixing plate (metal plate).
- 2) Please decide the final dimensions at your side after confirmation by the actual applications, Because mounting efficiency and mounted stabilization are dependent on mounting hole corner curve and punched state.
- 3) Tolerance shall be ±0.1mm

Parts

This product is assembled using the below parts.

• Photodetector (qty.: 1) [Using a silicon photodiode as light detecting portion, and a bipolar IC as signal processing circuit]

Category	Maximum Sensitivity wavelength (nm)	Sensitivity wavelength (nm)	Response time (µs)
Photodiode	900	700 to 1 200	400

Using a silicon photodiode as light detecting portion, and a bipolar IC as signal processing circuit.

• Photo emitter (qty.: 1)

Category	Material	Maximum light emitting wavelength (nm)	I/O Frequency (MHz)
Infrared emitting diode (non-coherent)	Gallium arsenide (GaAs)	950	0.3

Material

Case	Lens	Bottom cover
Black polyphernylene Sulfide resin (UL94 V-0)	Polycarbonate resin (UL94 V-2)	Polycarbonate resin (Black) (UL94 V-2)

Others

Laser generator is not used.

■ Manufacturing Guidelines

Cleaning instructions

Polycarbonate resin is used as the material of the lens surface. So this product shall not be cleaned by cleaning solvent absolutely. Dust and stain shall clean by air blow, or shall clean by soft cloth.

Presence of ODC

This product shall not contain the following materials.

And they are not used in the production process for this product.

Regulation substances: CFCs, Halon, Carbon tetrachloride, 1.1.1-Trichloroethane (Methylchloroform)

Specific brominated flame retardants such as the PBBOs and PBBs are not used in this product at all.

This product shall not contain the following materials banned in the RoHS Directive (2002/95/EC).

•Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyls (PBB), Polybrominated diphenyl ethers (PBDE).

Sheet No.: D3-A05201FEN

■ Package specification

Sleeve package

Package materials

Anti-static plastic bag: Polyethtylene

Moltopren: Urethane

Packing case: Corrugated fiberboard

Package method

100 pcs of products shall be packaged in a plastic bag, Ends shall be sealed by stapler. The bottom ot the packing case is covered with moltopren, and 3 plastic bags shall be put int the packing case.

Moltopren should be located after all product are settled (1 packing conteains 300 pcs).

Packing composition

Sheet No.: D3-A05201FEN

■ Important Notices

- The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property rights. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP's devices.
- · Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structure, and other contents described herein at any time without notice in order to improve design or reliability. Manufacturing locations are also subject to change without notice.
- · Observe the following points when using any devices in this publication. SHARP takes no responsibility for damage caused by improper use of the devices which does not meet the conditions and absolute maximum ratings to be used specified in the relevant specification sheet nor meet the following conditions:
- (i) The devices in this publication are designed for use in general electronic equipment designs such as:
 - --- Personal computers
 - --- Office automation equipment
 - --- Telecommunication equipment [terminal]
 - --- Test and measurement equipment
 - --- Industrial control
 - --- Audio visual equipment
 - --- Consumer electronics
- (ii) Measures such as fail-safe function and redundant design should be taken to ensure reliability and safety when SHARP devices are used for or in connection

with equipment that requires higher reliability such as:

- --- Transportation control and safety equipment (i.e., aircraft, trains, automobiles, etc.)
- --- Traffic signals
- --- Gas leakage sensor breakers
- --- Alarm equipment
- --- Various safety devices, etc.
- (iii) SHARP devices shall not be used for or in connection with equipment that requires an extremely high level of reliability and safety such as:
 - --- Space applications
 - --- Telecommunication equipment [trunk lines]
 - --- Nuclear power control equipment
 - --- Medical and other life support equipment (e.g., scuba).
- · If the SHARP devices listed in this publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Law of Japan, it is necessary to obtain approval to export such SHARP devices.
- This publication is the proprietary product of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.
- · Contact and consult with a SHARP representative if there are any questions about the contents of this publication.
