

3 TERMINAL 1.0A POSITIVE VOLTAGE REGULATORS

DESCRIPTION

The SK78XXA series of three-terminal positive regulators are available in TO-220 and TO220F packages. Each type employs internal current limiting, thermal shut-down and safe area protection, making it essentially indestructible. If adequate heat sinking is provided, they can deliver over 1.0A output current. Although designed as fixed voltage regulators, these devices can be used with external components to obtain adjustable voltage and currents.
