Application Note: AN_SY6280
Low Loss Power Distribution Switch TARGET DESIGN SPECIFICATION

Preliminary Spec

## General Description

The SY6280 develops ultra-low Rds(on) switch with programmable current limiting to protect the power source from over current and short circuit conditions. It integrates the over temperature protection and discharges the output capacitor during the shutdown. In case the output is pulled higher than the input voltage under the shutdown, the SY6280 can block the current flowing from the output to the input.

## Features

- Distribution voltages: 2.4 V to 5.5 V
- Programmable current limit
- Enable polarity: active high
- Over temperature shutdown and automatic retry
- Reverse blocking (no body diode)
- At shutdown, OUT can be forced higher than IN
- Automatic output discharge at shutdown
- Compact SOT23 packages minimize the board space.

## Applications

- USB 3G Datacard
- USB Dongle
- MiniPCI Accessories
MiniPCI Accessories

Temperature Range: $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$

## Ordering Information

 SY6280 $\square$ ( $\square \square$ )Package Code
Optional Spec Code

| Ordering Number | Package type | Note |
| :---: | :---: | :---: |
| SY6280AAC | SOT23-5 | ---- |

## Typical Applications

Figure 1. Schematic Diagram

## Pinout (top view)

| Pin Name | Pin number | Pin Description |
| :---: | :---: | :--- |
| IN | 5 | Input pin |
| GND | 2 | Ground pin |
| OUT | 1 | Output pin |
| EN | 4 | ON/OFF control. Pull high to enable IC. Do not float. |
| ISET | 3 | Current limit programming pin. Connecta resistor Rset from this pin <br> to GND to program the current limit: dlim (A) $=6800 /$ Rset (ohm) |

Absolute Maximum Ratings (Note 1)
All pins ..... 6V
Power Dissipation, Pd @ $\mathrm{TA}=25^{\circ} \mathrm{C}$ SOT23-5 ..... 0.6W
Package Thermal Resistance (Note 2)
$\theta_{\mathrm{JA}}$ ..... $200^{\circ} \mathrm{C} / \mathrm{W}$
$\theta_{\text {лс }}$ ..... $130^{\circ} \mathrm{C} / \mathrm{W}$
Junction Temperature Range ..... $150^{\circ} \mathrm{C}$
Lead Temperature (Soldering, 10 sec .) ..... $260^{\circ} \mathrm{C}$
Storage Temperature Range ..... $-65^{\circ} \mathrm{C}$ to $150^{\circ} \mathrm{C}$
ESD Susceptibility (Note 2)HBM (Human Body Mode)2kV
MM (Machine Mode) ..... 200 V
Recommended Operating Conditions (Note 3)
IN- ..... 2.4 V to 5.5 V
All other pins ..... $0-5.5 \mathrm{~V}$
Junction Temperature Range ..... $-40^{\circ} \mathrm{C}$ to $125^{\circ} \mathrm{C}$
Ambient Temperature Range $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$

| Thermal Shutdown Temperature | $\mathrm{T}_{\text {SD }}$ | $\cdots$ |  | 130 |  | ${ }^{\circ} \mathrm{C}$ |
| Thermal Shutdown Hysteresis |  | 8 |  | 20 |  | ${ }^{\circ} \mathrm{C}$ |

Note 1: Stresses listed as the above "Absolute Maximum Ratings" may cause permanent damage to the device. These are for stress ratings. Functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may remain possibility to affect device reliability.

Note 2: $\theta \mathrm{JA}$ is measured in the natural convection at $\mathrm{TA}=25^{\circ} \mathrm{C}$ on a low effective single layer thermal conductivity test board of JEDEC 51-3 thermal measurement standard. Pin 2 of SOT23-5 packages is the case position for $\theta \mathrm{JC}$ measurement.

Note 3: The device is not guaranteed to function outside its operating conditions

## Typical Operating Characteristics

## Operation

The SY6280 is a current limited P-channel MOSFET power switch designed for high-side load-switching applications. There is no parasitic body diode between drain and source of the MOSFET, so the SY6280 prevents current flow from out to input when out being externally forced to a higher voltage than vin when chip is disabled.

## Over-current protection

When the over-current condition is sensed, the gate of the pass switch is modulated to achieve constant output current. Under output short circuit conditions, the normal current limit folded back $50 \%$. If the over current condition presists for a long enough time, the junction temperature may exceed 130C, and overtemperature protection will shut down the part. Once the chip temperature drops to 110 C , the part will restart.

## Supply Filter Capacitor

In order to prevent the input voltage drooping during hot-plug events, a $10 u \mathrm{~F}$ ceramic capacitor form $\mathrm{V}_{\text {IN }}$ to GND is strongly recommended. However, higher capacitor values could reduce the voltage droop on the input further. Furthermore, an output short will cause ringing on the input without the input capacitor It could destroy the internal circuitry when the input transient exceed 6 V which is the absolute maximum supply voltage even for a short duration.

## Current Limiting Setting

Current limiting is programmable to protect the power source from over current and short circuit conditions. Connect a resistor $\mathrm{R}_{\text {SET }}$ from this ISET pin to GND to program the current limit:

Anductance) between the port and the capacitor and improve transient performance.
Input and output capacitors should be placed closed to the IC and connected to ground plane to reduce noise coupling.
> Locate the ceramic bypass capacitors as close as possible to the $\mathrm{V}_{\text {IN }}$ pins and $\mathrm{V}_{\text {out }}$ pins of SY 6280 .
$\operatorname{Ilim}(A)=6800 /$ Rset (ohm).
> Locate the output capacitor as close to the connectors as possible to lower impedance(mainly

## PCB Layout Guide

For best performance of the SY6280, the following guidelines must be strictly followed:
> Keep all $\mathrm{V}_{\text {Bus }}$ traces as short and wide as possible and use at least 2 ounce copper for all $\mathrm{V}_{\text {Bus }}$ traces.
> Place a ground plane under all circuitry to lower both resistance and inductance and improve DC and transient performance.

PCB Layout Guide(SOT23-5)

## SOT23-5 Package outline \& PCB layout design

Notes: All dimensions are in millimeters.
Al dimensions don't include mold flash \& metal burr.
