

## ABO PROTOTYPING BOARD USER'S GUIDE

#### 1. Summary

The AB0 prototype board provides access to all MCU I/O signals through use of a 96–pin connector, which mates directly with other target boards featuring a 96–pin expansion connector.

The 96-pin plug connector is manufactured by Tyco Electronics Amp, part number 650947-5; Digi-Key part number A1279-ND. The corresponding socket connector is also manufactured by Tyco Electronics Amp, part number 5650461-5, Digi-Key part number A32863-ND.

#### 2. Features

- 96-pin 3 row connector
- 0.1" center through-hole access to connector pins
- Two sets of high and low rails for digital and analog supply and ground
- An array of individual through-holes

### 3. Hardware Setup

A compatible target board is connected to the accessory board as shown in Figure 1.

Silicon Labs intends to provide customers with the latest, accurate, and in-depth documentation of all peripherals and modules available for system and software implementers using or intending to use the Silicon Labs products. Characterization data, available modules and peripherals, memory sizes and memory addresses refer to each specific device, and "Typical" parameters provided can and do vary in different applications. Application examples described herein are for illustrative purposes only. Silicon Labs reserves the right to make changes without further notice and limitation to product information, specifications, and descriptions herein, and does not give warranties as to the accuracy or completeness of the included information. Silicon Labs shall have no liability for the consequences of use of the information supplied herein. This document does not imply or express copyright licenses granted hereunder to design or fabricate any integrated circuits. The products are not designed or authorized to be used within any Life Support System without the specific written consent of Silicon Labs. A "Life Support System" is any product or system intended to support or sustain life and/or health, which, if it fails, can be reasonably expected to result in significant personal injury or death. Silicon Labs products are not designed or authorized for military applications. Silicon Labs products shall under no circumstances be used in weapons of mass destruction including (but not limited to) nuclear, biological or chemical weapons, or missiles capable of delivering such weapons.
