

EFM[®]32

... the world's most energy friendly microcontrollers

32-bit ARM Cortex-M0 and Cortex-M3 microcontrollers for:

- Energy, gas, water and smart metering • Alarm and security systems
- Health and fitness applications • Industrial and home automation

EFM32 increases battery life by reducing the total energy consumption

1. Very low active power consumption

EFM32 only uses 160 $\mu\text{A}/\text{MHz}$ with a 3 volts power supply while running application code

2. Reduced processing time

The low power, high performance 32-bit Cortex-M3 and Cortex-M0 reduce the spent time in active mode

3. Very fast wake-up time

Short 2 μs wake-up time supports high efficiency energy modes and increases responsiveness

4. Ultra-low standby current

Full RAM and CPU retention + POR + BOD + RTC while using only 0.9 μA (Energy Mode 2)

5. Autonomous peripheral operation

Applications can perform advanced tasks without using the Cortex CPU

6. PRS - Peripheral Reflex System

Predictable and fast signalling between peripherals without any CPU intervention

7. Well architected Energy Modes

Optimize your application with 5 flexible Energy Modes and sub μA operation

8. Extremely energy efficient peripherals

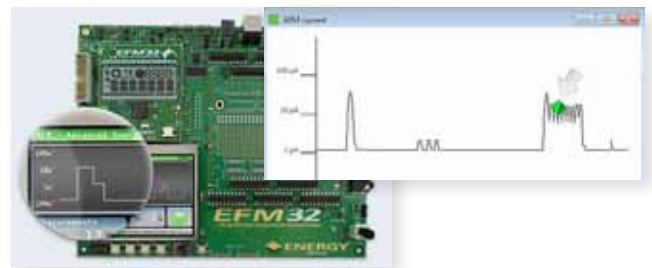

- ADC: 12-bit, 1 Msps at only 350 μA
- Analog Comparator: using as little as 100 nA
- LCD Controller: 8x36 segments at only 0.55 μA
- LEUART: Full UART @ 9600 bps using only 150 nA
- AES: 128/256-bit AES crypto-engine in only 54/75 cycles

9. AEM - Advanced Energy Monitoring

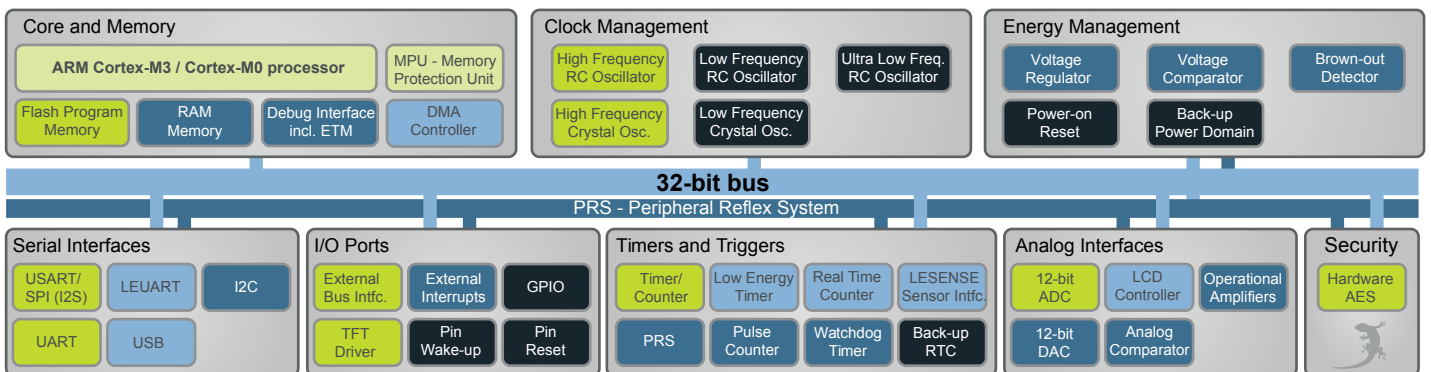

Measure and review your prototype's current consumption profile in real-time on our starter kits

10. Simplicity Studio and energyAware software

Fast design cycles, power profiling and energy debugging of application code to remove current drains

EFM32 includes the most energy friendly peripherals and energy modes

* Reduced LESENSE functionality without DAC

** Reduced LCD Controller functionality when using EBI (External Bus Interface)

Operation range: 1.8 - 3.8 volts, -40 - 85 C
 On-chip memory: Up to 1 MB Flash and 128 KB RAM
 General Purpose IO: Up to 90 pins with 20 mA drive strength

QFN16 (4x4 mm)
QFP48 (7x7 mm, 0.5 pitch)

QFN24 (5x5 mm, 0.65 pitch)
QFP100 (14x14 mm, 0.5 pitch)

QFN32 (6x6 mm, 0.65 pitch)
BGA112 (10x10 mm, 0.8 pitch)

QFN64 (9x9 mm, 0.50 pitch)

Simplicity

EFM32 microcontrollers are supported by development tools designed to significantly cut design time

Development Kits
 EFM32-G2xx-DK
 EFM32-G8xx-DK (LCD support)

energymicro.com/tools

Starter Kits
 EFM32-G8xx-STK (LCD support)
 EFM32-TG-STK3300 (LCD support)

energymicro.com/tools

Online Documentation
 Free manuals, datasheets, application notes, software library and code examples.

energymicro.com/downloads

Simplicity Studio
 Instant, one-click access to all your EFM32 tools, software, news, documents and resources.

energymicro.com/simplicity

energyAware Profiler
 Unique real-time power profiler and energy debugger finds and removes energy bugs from your code.

energymicro.com/software

energyAware Designer
 Fast and easy EFM32 MCU configuration tool that instantly resolves pin conflicts.
