## SIKYWORIKS

## DATA SHEET

## SKY13489-001: 0.7 to 2.7 GHz SPDT High Power Switch (Single Bit Control) in a WLCSP Package

## Applications

- LTE TDD/FDD transmit
- GSM transmit
- Embedded modules

## Features

- Broadband frequency range: 0.7 to 2.7 GHz
- Low insertion loss: $0.3 \mathrm{~dB} @ 2.7 \mathrm{GHz}$
- High isolation: 22 dB up to 2.7 GHz
- No external DC blocking capacitors required
- Single GPIO control line with Vdd voltage regulator:
- VCTL $=1.35$ to 3.00 V
$-\mathrm{VDD}=2.45$ to 4.80 V
- Small, 6-bump WLCSP, $217 \mu \mathrm{~m}$ diameter, $400 \mu \mathrm{~m}$ pitch ( $1.135 \times 0.735 \times 0.400 \mathrm{~mm}$ ) package (MSL1, $260{ }^{\circ} \mathrm{C}$ per JEDEC J-STD-020)

Skyworks Green ${ }^{\text {TM }}$ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to Skyworks Definition of Green ${ }^{T M}$, document number SQ04-0074.

Figure 1. SKY13489-001 Block Diagram

## Description

The SKY13489-001 is a single-pole, double-throw (SPDT) LTE/WCDMA/GSM transmit switch. Switching is controlled by an integrated GPIO interface with a single control pin. Depending on the logic voltage level applied to the control pin, the antenna port is connected to one of the switched RF outputs (RF1 or RF2) through a low insertion loss path, while the path between the antenna port and the other RF port is in a high isolation state.
No external DC blocking capacitors are required as long as no DC voltage is applied on any RF path.
The SKY13489-001 is provided in a compact 6-bump, $1.135 \times 0.735 \times 0.400 \mathrm{~mm}$ Wafer Level Chip Scale Package (WLCSP) that meets requirements for board-level assembly. Bump diameters are 217 microns with a minimum bump pitch of 400 microns.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

Table 1. SKY13489-001 Signal Descriptions

| Pin | Name | Description | Pin | Name | Description |
| :--- | :--- | :--- | :---: | :--- | :--- |
| A1 | RF1 | RF I/0. Throw 1 of the switch. | B1 | V1 | Digital control input |
| A2 | ANT | Antenna | B2 | GND | Ground |
| A3 | RF2 | RF I/0. Throw 2 of the switch. | B3 | VDD | Supply voltage |

## Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY13489-001 are provided in Table 2. Electrical specifications are provided in Tables 3 through 5.

The state of the SKY13489-001 is determined by the logic provided in Table 6.

Table 2. SKY13489-001 Absolute Maximum Ratings ${ }^{1}$

| Parameter | Symbol | Minimum | Maximum | Units |
| :--- | :--- | :--- | :---: | :---: |
| Supply voltage | VDD | 2.4 | 5.0 |  |
| Digital control voltage | VCTL | -0.2 | +3.2 |  |
| RF input power | PIN |  | +39 | V |
| Operating temperature | TOP | -40 | +90 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature | TSTG | -55 | +150 | ${ }^{\circ} \mathrm{C}$ |

1 Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

ESD HANDLING: Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD when handling or transporting. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD handling precautions should be used at all times.

## Evaluation Board Description

The SKY13489-001 Evaluation Board is used to test the performance of the SKY13489-001 SPDT Switch.

An Evaluation Board schematic diagram is provided in Figure 3.
An assembly drawing for the Evaluation Board is shown in Figure 4.

Ground

Figure 3. SKY13489-001 Evaluation Board Schematic

Figure 4. SKY13489-001 Evaluation Board Assembly Diagram

## Package Dimensions

The typical part marking for the SKY13489-001 is shown in Figure 5.The PCB layout footprint for the SKY13489-001 is shown in Figure 6. Package dimensions for the SKY13489-001 die are shown in Figure 7, and tape and reel dimensions are provided in Figure 8.

## Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.
The SKY13489-001 is rated to Moisture Sensitivity Level 1 (MSL1) at $260^{\circ} \mathrm{C}$. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, Wafer Level Chip Scale Packages: SMT Process Guidelines and Handling Considerations, document number 201676.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

Figure 5. SKY13489-001 PCB Layout Footprint

Figure 6. Typical Part Marking

Notes:

1. All measurements are in millimeters.
2. Marking shown is for package orientation reference only.
3. Ball height tolerance is $\pm 10 \%$ of nominal ball height.

202857-007
4. Package thickness includes backside laminate film.

Figure 7. SKY13489-001 Package Dimensions

Detail B
Notes:

1. Carrier tape must meet all requirements of Skyworks GP01-D233 procurement spec for tape and reel shipping.
2. Carrier tape material: black conductive polystyrene or polycarbonate.
3. Cover tape material: transparent conductive.
4. ESD surface resistivity must meet GP01-D233.
5. 10 -sprocket hole pitch cumulative tolerance: $\pm 0.20 \mathrm{~mm}$.
6. Pocket position relative to sprocket hole measured as true position of pocket.
7. All dimensions are in millimeters.
