Overview

The Sonel CMP-2000 Clamp Meter is designed to work in high current rating up to 2000 A.

A special INRUSH function allows to measure the maximal instantaneous input current drawn by an electrical device when first turned on.

Measurements of large-diameter cables will not be a problem thanks to the 57 mm jaws. CMP-2000 is the best solution for professional electricians.

Special features

- double LCD to display more than one value at the same time
- safe, insulated measurement clamp
- automatic selection of measuring ranges
- HOLD function, allowing for freezing the result on the display
- backlit LCD
- Delta ZERO function, relative measurement mode for direct current - capability of zeroing the instrument at any time and returning to measurement in absolute mode
- holding of minimum and maximum values
- indication of range overflow
- automatic power down after 30 minutes

Facilitating the measurements

The AC-16 adapter expands the application of the clamp meter. With the ratio x1 and x10, 230 V AC of voltage and max 16 A of current, the adapter can be applied with any type of clamp meter.
