

200 mA very low quiescent current linear regulator IC

DFN4 1x1

SOT23-5L

Features

- Input voltage from 1.5 to 5.5 V
- Ultra low dropout voltage (200 mV typ. at 200 mA load)
- Very low quiescent current (20 μ A typ at no load, 0.03 μ A typ in off mode)
- Output voltage tolerance: $\pm 0.5\%$ (A version) or $\pm 2.0\%$ @ 25 °C (standard version)
- 200 mA guaranteed output current
- High PSRR (80 dB@1 kHz, 50 dB@100 kHz)
- Wide range of output voltages available on request: from 0.8 V up to 5.0 V in 50 mV step
- Logic-controlled electronic shutdown
- Internal soft-start
- Optional output voltage discharge feature
- Compatible with ceramic capacitor $C_{OUT} = 0.47\ \mu$ F
- Internal current limit and thermal protections
- Available in DFN4 1x1 and SOT23-5L packages
- Operating temperature range: -40 °C to 125 °C

Applications

- Mobile phones
- Tablets
- Digital still cameras (DSC)
- Cordless phones and similar battery-powered systems
- Portable media players

[LD39020](#)

Description

The [LD39020](#) high accuracy voltage regulator provides 200 mA of maximum current from an input voltage ranging from 1.5 V to 5.5 V, with a typical dropout voltage of 200 mV.

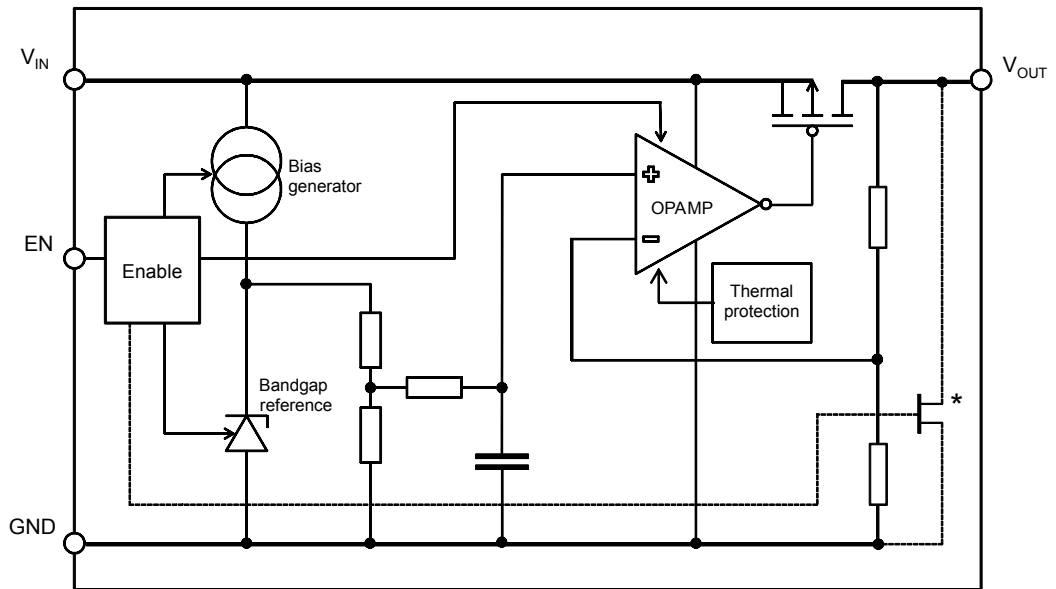

It is available in DFN4 1x1 and SOT23-5L packages, allowing the maximum space saving.

The device is stabilized with a ceramic capacitor on the output. The ultra low drop voltage, low quiescent current and low noise features, together with the internal soft-start circuit, make the [LD39020](#) suitable for low power battery-operated applications.

An enable logic control function puts the [LD39020](#) in shutdown mode allowing a total current consumption lower than 0.1 μ A. Constant current and thermal protection are provided.

6 Application information

6.1 Soft-start function

The LD39020 has an internal soft start circuit. By increasing the startup time up to 100 μs , without the need of any external soft start capacitor, this feature is able to keep the regulator inrush current at startup under control.

6.2 Output discharge function

The LD39020 integrates a MOSFET connected between V_{OUT} and GND. This transistor is activated when the EN pin goes to low logic level and has the function to quickly discharge the output capacitor when the device is disabled by the user.

The device is available with or without auto-discharge feature.

See [Table 10. DFN4 1x1 order code](#) for more details.

6.3 Input and output capacitors

The LD39020 requires external capacitors to assure the regulator control loop stability.

Any good quality ceramic capacitor can be used but, the X5R and the X7R are suggested since they guarantee a very stable combination of capacitance and ESR overtemperature.

Locating the input/output capacitors as closer as possible to the relative pins is recommended.

The LD39020 requires an input capacitor with a minimum value of 1 μF .

This capacitor must be located as closer as possible to the input pin of the device and returned to a clean analog ground.

The control loop of the LD39020 is designed to work with an output ceramic capacitor.

This capacitor must meet the requirements of minimum capacitance and equivalent series resistance (ESR), as shown in [Figure 18. Stability area vs. \(\$C_{\text{OUT}}\$, ESR\)](#). To assure stability, the output capacitor must maintain its ESR and capacitance in the stable region, over the full operating temperature range.

The LD39020 shows stability with a minimum effective output capacitance of 220 nF.

However, to keep stability in all operating conditions (temperature, input voltage and load variations), a minimum output capacitor of 0.47 μF is recommended.

The suggested combination of 1 μF input and output capacitors offers a good compromise among the stability of the regulator, optimum transient response and total PCB area occupation.

04-Dec-2013	1	Initial release.
02-Apr-2014	2	Updated Table 10: "DFN4 1x1 order codes"..
05-Jun-2015	3	Added SOT23-5L package. Modified features and description in cover page. Updated Section 7: "Pin configuration" and Table 3: "Thermal data". Added Section 13.2: "SOT23-5L package information" and Section 13.3: "SOT23-5L packing information". Minor text changes.
03-Jul-2015	4	Updated package name from DFN1x1-4L to DFN4 1x1. Updated note in Table 11: "SOT23-5L order code". Minor text changes.
07-Jan-2019	5	Added Figure 31. DFN4 1x1 tape outline , Figure 32. DFN4 1x1 reel outline and Figure 33. DFN4 1x1 orientation . Updated Section 9 Order code .
