LET9045F

## RF power transistor from the LdmoST family of n-channel enhancement-mode lateral MOSFETs

## Features

■ Excellent thermal stability

- Common source configuration

■ $\mathrm{P}_{\text {OUT }}(@ 28 \mathrm{~V})=45 \mathrm{~W}$ with 18.5 dB gain @ 960 MHz

- $\mathrm{P}_{\text {OUT }}(@ 36 \mathrm{~V})=70 \mathrm{~W}$ with 18.5 dB gain @ 960 MHz
- BeO free package

■ In compliance with the 2002/95/EC European directive

## Description

The LET9045F is a common source $n$-channel enhancement-mode lateral field-effect RF power transistor designed for broadband commercial and industrial applications at frequencies up to 1.0 GHz . The LET9045F is designed for high gain and broadband performance operating in common source mode at 28 V . It is ideal for base station applications requiring high linearity.

## 6 Package mechanical data

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK ${ }^{\circledR}$ packages, depending on their level of environmental compliance. ECOPACK ${ }^{\circledR}$ specifications, grade definitions and product status are available at: www.st.com.
ECOPACK ${ }^{\circledR}$ is an ST trademark.
