

## Turbo 2 ultrafast high voltage rectifier

Datasheet - production data

## Features

- Ultrafast switching
- Low reverse current
- Low thermal resistance
- Reduces switching and conduction losses
- Repetitive peak reverse voltage specified from -40 °C to +175 °C

## Description

The STTH80S06, which is using ST Turbo 2 600 V technology, is specially suited for use in switching power supplies, and solar inverters. Thanks to its low  $V_F$  characteristics, as well as fast recovery, this device exhibits high performance in free-wheeling applications or boost converters working at switching frequency up to 100 kHz.
