Related products	
TSB611, TSB612	For lower power consumption
TSB571, TSB572, TSB514	For higher speed and rail-to-rail inputs
TSB711, TSB712	For a higher precision and speed

Features

- Low offset voltage: 1 mV max. @ 25 °C
- Low current consumption: 375 µA max. / operator @ 36 V
- Wide supply voltage: 2.7 to 36 V
- Gain bandwidth product: 1.7 MHz
- Unity gain stable
- Rail-to-rail output
- Input common mode voltage incudes ground
- High ESD tolerance: 4 kV HBM
- EMI hardened
- Extended temperature range: -40 to 125 °C
- Automotive qualification

Applications

- Industrial
- Power supplies
- Automotive

Description

The TSB621, TSB622, TSB624 are general purpose operational amplifiers featuring an extended supply voltage operating range and rail-to-rail output. They also offer an excellent speed/power consumption ratio with 1.7 MHz gain bandwidth product while consuming less than 375 µA per operator at 36 V supply voltage.

The TSB621, TSB622, TSB624 operate over a wide temperature range from -40 °C to 125 °C making these devices ideal for industrial and automotive applications with the associated qualification.

Thanks to the small package size, the TSB621, TSB622, TSB624 can be used in applications where space on the board is limited. It can thus reduce the overall cost of the PCB.

1 Pin connections
