## 300mA, Low Consumption, CMOS LDO

### GENERAL DESCRIPTION

The SK6017 series are low dropout linear regulators and optimized to provide a high performance solution for battery power system to deliver low quiescent current. The devices offer a new level of cost effective performance in cellular phones, laptop and notebook computers, and other portable devices.

The SK6017 series are designed to make use of low cost ceramic capacitors which ensure the stability of the output current, and enhance the efficiency in order to prolong the battery life of those portable devices.

SK6017 can provide product selections of output value in the range of 1.2V~3.6V by every 0.1V step.

The SK6017 regulators are available in SOT23-5L packages. Standard products are Pb-free and Halogen free products.
