

Our VPP (Standard WECO), MVP (Mini WECO) and MMVP (Micro) Video Patchbays are used to patch high definition video in the world's largest broadcast facilities and mobile production units. All of our video patchbay products meet or exceed SMPTE ST 424:2006 specifications. The new MMVP Micro Video Patchbay offers the highest level of density - 96 patchpoints in 1RU!

We also offer a broad line of accessory products for all of our patchbays, including patchcords, insertion/withdrawal tools, terminating/looping plugs, adapters, color coded channel identification chips, cable mount BNC and DIN 1.0/2.3 connectors.

HIGH-DEFINITION VIDEO PATCHBAYS

VIDEO PATCHBAYS

Today's high definition broadcast facilities and mobile production units require the most technologically advanced equipment to ensure high quality distribution and processing of audio and video signals. With a broad line of patented audio, video and data patching products, Switchcraft® has been an integral part of this process for decades.

Founded in 1946, Switchcraft® is widely recognized as the world's leading manufacturer of professional audio and video interconnect products. Our team of designers, engineers, sales, marketing and manufacturing professionals work together in our 190,000 square foot facility to ensure the highest quality standards are met in every product we build. **Unlike other manufacturers, our finished products and nearly all of the components they consist of are designed, produced, assembled and tested in one facility (our Chicago, IL world headquarters). This gives us the ability to control every aspect of the design, manufacturing and assembly process from start to finish.**

MMVP SERIES VIDEO PATCHBAYS

High density (2x48) high definition video patchbays for video and AES digital audio patching in broadcast, mobile production, post production, etc.

FEATURES & BENEFITS

- Meet SMPTE ST 424:2006
- Rated to 3GHz
- Industry standard DIN 1.0/2.3 input/output connections
- Screw in, all metal jack design withstands vibration in mobile applications
- Based on proven, patented design of our MVJ Series of video jacks
- Cable tie bar for easy cable management
- Snap in designation strips
- Rated to 20,000 insertion/withdrawal cycles

OPTIONS

- 1RU, 1.5RU and 2RU rack heights (1RU height for AES Digital Audio version)
- Normalled, non-normalled, terminated and non-terminated
- Color coding system for easy channel identification
- Available with red frame to distinguish AES/EBU digital audio from HD video
- Accessories include DIN 1.0/2.3 insertion/withdrawal tool, looping plugs, channel identification chips and DIN 1.0/2.3 cable mount connector

MVP SERIES VIDEO PATCHBAYS

Mid-size WECO (2x32 or 2x34) High Definition Video Patchbays

FEATURES & BENEFITS

- Meet SMPTE ST 424:2006
- Rated to 3GHz
- Industry standard 75 Ohm BNC input/output connections
- Screw in, all metal jack design withstands vibration in mobile applications
- Proven, patented design (MVJ mid-size video jack)
- Cable tie bar for easy cable management
- Snap in designation strips
- Rated to 30,000 insertion/withdrawal cycles

OPTIONS

- 1RU, 1.5RU and 2RU rack heights
- Normalled, non-normalled, terminated and non-terminated
- Accessories include true 75 Ohm cable mount BNC connectors
- Single video jacks, looping plugs, patch plugs and BNC to patch adapters also available

* See accessories page for more details
