Notice for TAIYO YUDEN products

Please read this notice before using the TAIYO YUDEN products.

REMINDERS

Product information in this catalog is as of October 2013. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or usage of the Products.

Please note that TAIYO YUDEN CO., LTD. shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this catalog or individual specification.

Please contact TAIYO YUDEN CO., LTD. for further details of product specifications as the individual specification is available.

Please conduct validation and verification of products in actual condition of mounting and operating environment before commercial shipment of the equipment.

All electronic components or functional modules listed in this catalog are developed, designed and intended for use in general electronics equipment.(for AV, office automation, household, office supply, information service, telecommunications, (such as mobile phone or PC) etc.). Before incorporating the components or devices into any equipment in the field such as transportation,(automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network (telephone exchange, base station) etc. which may have direct influence to harm or injure a human body, please contact TAIYO YUDEN CO., LTD. for more detail in advance.

Do not incorporate the products into any equipment in fields such as aerospace, aviation, nuclear control, submarine system, military, etc. where higher safety and reliability are especially required.

In addition, even electronic components or functional modules that are used for the general electronic equipment, if the equipment or the electric circuit require high safety or reliability function or performances, a sufficient reliability evaluation check for safety shall be performed before commercial shipment and moreover, due consideration to install a protective circuit is strongly recommended at customer's design stage.

The contents of this catalog are applicable to the products which are purchased from our sales offices or distributors (so called "TAIYO YUDEN' s official sales channel").
It is apply applied to the products our sales of TAIYO YUDEN' sofficial sales channel".

It is only applicable to the products purchased from any of TAIYO YUDEN's official sales channel.

Please note that TAIYO YUDEN CO., LTD. shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from your usage of products in this catalog. TAIYO YUDEN CO., LTD. grants no license for such rights.

Caution for export

Certain items in this catalog may require specific procedures for export according to "Foreign Exchange and Foreign Trade Control Law" of Japan, "U.S. Export Administration Regulations", and other applicable regulations. Should you have any question or inquiry on this matter, please contact our sales staff.

TAIYO YUDEN 2014

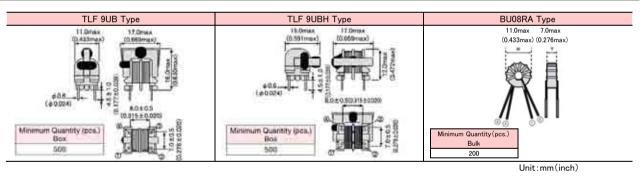

LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES

RELIABILITY DATA

| 1. Operating Tempe | 1. Operating Temperature Range | | | |
|----------------------------|--|-------------|--|--|
| Specified Value | BU-RA Type | −25~+ 105°C | | |
| | TLH, TLF Type | -23~+ 105 C | | |
| Test Method and Remarks | Including temperature rise due to self-generated heat. | | | |

| 2. Storage temperature range | | | |
|------------------------------|---------------|------------|--|
| Specified Value | BU-RA Type | -40~+ 85°C | |
| | TLH, TLF Type | | |

| 3. Rated current | | | | |
|----------------------------|--|--------------------|---|--|
| Specified Value | BU-RA Type | | Within the specified range | |
| Specified value | TLH, TLF Type | | | |
| Test Method and Remarks | TLH10U, TLF10UA TLF9UA, 14CB、24HB TLF9UB | : The maximum valu | e of AC current within the temperature rise of 60° C e of AC current within the temperature rise of 45° C e of DC current within the temperature rise of 45° C | |

| 4. Inductance | | | | | |
|-----------------|---------------------------------------|----------------|--------------------------------|--|--|
| Specified Value | BU-RA Type | | | | |
| Specified Value | TLH, TLF Type | | Within the specified tolerance | | |
| | BU-RA | | | | |
| | Measuring equipment | : HP4262A | | | |
| | TLF9U : | | | | |
| | Measuring equipment : LCR meter 4 | | 84A or its equivalent | | |
| Test Method and | lethod and Measuring frequency : 1kHz | | | | |
| Remarks | Measuring voltage | : 1Vrms | | | |
| | TLH、TLF(except TLF9U): | | | | |
| | Measuring equipment | : LCR meter 42 | 84A or its equivalent | | |
| | Measuring frequency | : 1kHz | | | |
| | Measuring voltage | : 0.1Vrms | | | |

| 5. DC resistance | 5. DC resistance | | | | |
|----------------------------|---------------------|---------------|--------------------------------|--|--|
| Specified Value | BU-RA Type | | | | |
| Specified Value | TLH, TLF Type | | Within the specified tolerance | | |
| Test Method and Remarks | Measuring equipment | : DC ohmmeter | | | |

| 6. Terminal strengt | h tensile force | | | |
|---------------------|--|---|--|--|
| Specified Value | BU-RA Type | | No abnormality | |
| Specified value | TLH, TLF Type | | | |
| Test Method and | | | ally in the direction to draw terminal $5N$, 10 ± 1 sec. ed tensile force gradually in the direction to draw terminal. | |
| Remarks | TLH10UAH, TLF (except force [N] 10 | TLF9U): Apply the s duration [s] 30±5 | stated tensile force gradually in the direction to draw terminal. | |

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification.

For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty=top.com/).

| 7. Insulation resista | 7. Insulation resistance between wires | | | | |
|----------------------------|--|----------|----------------|--|--|
| Specified Value | BU-RA Type | | 100MΩ min. | | |
| Specified value | TLH, TLF Type | | | | |
| Test Method and Remarks | Applied voltage : 50VDC (BU-RA,) : 500VDC (TLH, TLF (e : 250VDC (TLF9UB) | | ccept TLF9UB)) | | |
| | Duration | : 60sec. | | | |

| 8. Insulation resista | 8. Insulation resistance between wire and core | | | |
|-----------------------|--|-------------------|---|--|
| Specified Value | BU-RA Type | | | |
| Specified value | TLH, TLF Type | | 100M Ω min.(except TLH, TLF10UAH Type) | |
| | TLF : | | | |
| Test Method and | Applied voltage | | | |
| Remarks | | : 250VDC (TLF9UB) | | |
| | Duration : 60 sec. | | | |

| 9. Withstanding : be | tween wires | | |
|------------------------|--|-------------------------------|-----------------|
| Cara different Markers | BU-RA Type | | No abnormality |
| Specified Value | TLH, TLF Type | | |
| Test Method and | Applied voltage : 250VDC (BU-RA) : 2000VAC (TLH, TLF (except TLF9UB)) | | except TLF9UB)) |
| Remarks | Duration | : 500VDC (TLF9UB) : 60sec. | |

| 10. Withstanding : b | 10. Withstanding : between wires and core | | | |
|----------------------------|--|--|---|--|
| Specified Value | BU-RA Type | | | |
| Specified value | TLH, TLF Type | | No abnormality(except TLH, TLF10UAH Type) | |
| Test Method and Remarks | TLF : Applied voltage : 2000VAC (TLF (excep : 500VDC (TLF9UB) Duration : 60sec. | | t TLF9UB)) | |

| 11. Rated voltage | 11. Rated voltage | | | |
|-------------------|--------------------------|----------|----------------------------|--|
| Specified Value | BU—RA Type | | Within the specified range | |
| Specified value | TLH, TLF Type | | | |
| Test Method and | TLH, TLF (except TLF9UB) | : 250VAC | | |
| Remarks | BU-RA,TLF9UB | : 50VDC | | |

| 12. Resistance to v | ibration | | |
|----------------------------|---|--|--|
| | BU—RA Type | | |
| Specified Value | TLH, TLF Type | | TLF9U : Inductance change : Within $\pm 5\%$ TLH, TLF (except TLF9U) : Appearance is no abnormality and within the specified range |
| Test Method and Remarks | Frequency range: 10 to 55 to 10HzAmplitude: 1.5mm (shall notMounting method: soldering onto PGRecovery: At least 1hr of r | | exceed acceleration 196m/s ²) |

TAIYO YUDEN

| 13. Solderability | | | |
|-------------------|---|---|--|
| Specified Value | BU-RA Type | | At least 75% of terminal electrode is covered by new solder. |
| Specified value | TLH, TLF Type | | At least 90% of terminal electrode is covered by new solder. |
| Test Method and | TLH, TLF : Solder temperature Duration Immersion depth | : 235±0.5℃ : 2±0.5sec. : Up to 1.5 to 2.0mr | n from PBC mounted level. |
| Remarks | TLH, TLF : Solder temperature Duration Immersion depth | : 245±5°C : 4±1sec. : Up to 1.0 to 1.5mr | n from PBC mounted level. |

| 14. Resistance to s | oldering heat | | |
|---------------------|---|---|---|
| Specified Value | BU—RA Type | | Appearance : No abnormality Inductance change : Within $\pm 15\%$ |
| Specified Value | TLH, TLF Type | | TLF9UA : Inductance change : Within $\pm 5\%$ TLF14CB : Appearance is no abnormality and within the specified range |
| Test Method and | TLH, TLF : Solder temperature Duration Immersion depth Recovery | | n from PBC mounted level. covery under the standard condition after the removal from test chamber, followed by the thin 2hrs. |
| Remarks | TLH, TLF : Solder temperature Duration Immersion depth Recovery | • | n from PBC mounted level. covery under the standard condition after the removal from test chamber, followed by the thin 2hrs. |

| 15. Thermal shock | | |
|----------------------------|---|--|
| Specified Value | BU-RA Type | Appearance : No abnormality Inductance change : Within $\pm 15\%$ |
| | TLH, TLF Type | TLF9UA : Inductance change : Within $\pm 15\%$ TLH, TLF (except TLF9UA) : Withstanding voltage : No abnormality Insulation resistance : No abnormality |
| Test Method and Remarks | BU-RA,TLH, TLF : According to JIS C 0025 Conditions for 1 cycle -25°C~+85°C, keep each 30min Number of cycles : 10 Recovery : At least 1hr of recovery under the standard condition after the removal from test chamber, followed by the measurement within 2 hrs. | |

| 16. Damp heat | | |
|----------------------------|--|--|
| | BU-RA Type | |
| Specified Value | TLH, TLF Type | TLF9UA : Inductance change : Within $\pm 15\%$ TLH, TLF (except TLF9UA) : Withstanding voltage : No abnormality Insulation resistance : No abnormality |
| Test Method and Remarks | TLH, TLF : Temperature : $60\pm 2^{\circ}$ C : $40\pm 2^{\circ}$ C (\approx except TLF Humidity : $90 \sim 95\%$ RH Duration : 500 hrs Recovery : At least 1hr of recovery | ⁻ 9U) v under the standard removal from test chamber followed by the measurement within 2 hrs. |

| 17. Loading under o | lamp heat | | |
|----------------------------|--|---------------------------------------|--|
| | BU-RA Type | | Appearance : No abnormality Inductance change : Within $\pm 15\%$ |
| Specified Value | TLH, TLF Type | | Withstanding voltage : No abnormality Insulation resistance : No abnormality |
| | BU-RA : Temperature Humidity Applied current Recovery | | urrent across windings (※except TLF9U) ry under the standard removal from test chamber followed by the measurement within 2 hrs. |
| Test Method and Remarks | TLH, TLF : Temperature Humidity Duration Applied voltage | : Apply the following sp TLF9UA 25 | LF9U) urrent across windings (※except TLF9U) <u>ecified voltage</u> between windings. 50VAC DVDC |
| | Recovery | : At least 1hr of recove | ry under the standard removal from test chamber followed by the measurement within 2 hrs. |

| 18. Low temperatur | e life test | |
|----------------------------|---|---|
| | BU—RA Type | Appearance : No abnormality Inductance change : Within $\pm 15\%$ |
| Specified Value | TLH, TLF Type | TLF9U : Inductance change : Within \pm 15% TLH, TLF (except TLF9U) : Withstanding voltage : No abnormality Insulation resistance : No abnormality |
| Test Method and Remarks | BU-RA,TLH, TLF : Temperature : -25±2°C : -40±2°C (※TLF•TLH Duration : 500 hrs Recovery : At least 1hr of recovery | i) under the standard removal from test chamber followed by the measurement within 2 hrs. |

| 19. High Temperatu | re life test | |
|----------------------------|--|--|
| | BU-RA Type | Appearance : No abnormality Inductance change : Within $\pm 15\%$ |
| Specified Value | TLH, TLF Type | TLF9U : Inductance change : Within $\pm 15\%$ TLH, TLF (except TLF9U) : Withstanding voltage : No abnormality Insulation resistance : No abnormality |
| Test Method and Remarks | BU-RA,TLH, TL F : Temperature : 85±2°C (※ BU-RA) : 105±3°C (※ TLF•TL Duration : 500 hrs Recovery : At least 1hr of recover | H) y under the standard removal from test chamber followed by the measurement within 2 hrs. |

TAIYO YUDEN

LEADED COMMON MODE CHOKE COILS FOR DC AND SIGNAL LINES, LEADED COMMON MODE CHOKE COILS FOR AC LINES

PRECAUTIONS

| 1. Circuit Design | |
|-------------------|---|
| Precautions | Operating environment The products described in this specification are intended for use in general electronic equipment, (office supply equipment, telecommunications systems, measuring equipment, and household equipment). They are not intended for use in mission-critical equipment or systems requiring special quality and high reliability (traffic systems, safety equipment, aerospace systems, nuclear control systems and medical equipment including life-support systems) where product failure might result in loss of life, injury or damage. For such uses, contact TAIYO YUDEN Sales Department in advance. |

| 2. PCB Design | |
|--------------------------|--|
| Precautions | Design 1. Please design insertion pitches as matching to that of leads of the component on PCBs. |
| Technical considerations | Design 1. When Inductors are mounted onto a PC board, hole dimensions on the board should match the lead pitch of the component, if not, it will cause breakage of the terminals or cracking of terminal roots covered with resin as excess stress travels through the terminal legs. |

| 3. Soldering | |
|-----------------------------|---|
| Precautions | Wave soldering Please refer to the specifications in the catalog for a wave soldering. Do not immerse the entire inductor in the flux during the soldering operation. Lead free soldering When using products with lead free soldering, we request to use them after confirming of adhesion, temperature of resistance to soldering heat, etc. sufficiently. Recommended conditions for using a soldering iron Put the soldering iron on the land-pattern. Soldering iron's temperature - Below 350°C Duration - 3 seconds or less The soldering iron should not directly touch the product. |
| Technical considerations | Lead free soldering If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products. Recommended conditions for using a soldering iron If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products. |

| 4. Cleaning | |
|-------------|---|
| Precautions | Cleaning conditions 1. TLF type Please contact any of our offices for about a cleaning. |

| 5. Handling | |
|-----------------------------|--|
| Precautions | Handling Keep the product away from all magnets and magnetic objects. Mechanical considerations Please do not give the product any excessive mechanical shocks. TLF type Please do not add any shock or power to a product in transportation. Packing Please do not give the product any excessive mechanical shocks. In loading, please pay attention to handling indication mentioned in a packing box (a loading direction / number of maximum loading / fragile item). |
| Technical considerations | Handling There is a case that a characteristic varies with magnetic influence. Mechanical considerations There is a case to be damaged by a mechanical shock. TLF type There is a case to be broken by a fall. Packing There is a case that a lead route turns at by a fall or an excessive shock. |

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification.

For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

| 6. Storage conditions | |
|--------------------------|---|
| Precautions | Storage To maintain the solderability of terminal electrodes and to keep the packing material in good condition, temperature and humidity in the storage area should be controlled. Recommended conditions |
| Technical considerations | Storage Under a high temperature and humidity environment, problems such as reduced solderability caused by oxidation of terminal electrodes and deterioration of taping/packaging materials may take place. |
