1. Introduction

The Taoglas GPVSF.25.8.A.08, with Taoglas Sure Technology, is a multi-band GPG and IRNSS, high-performance directional antenna for high precision GPS accuracy and fast positioning. Integration of IRNSS allows for better navigation accuracy and enables compliance with AIS-140 for tracking devices in use in India.

Typical applications include:

- :: UAVs and Robotics
- :: Marine
- :: RTK
- :: Transportation
- :: Agriculture
- :: Autonomous Vehicles
- :: Navigation

This compact antenna exhibits excellent radiation patterns and has a low noise figure to preserve signal quality to help with fast first time to fix speeds.

It has been tuned and tested on a 70 x 70 mm ground plane, working at GPS / IRNSS L1 and L5 bands. Patch antennas can be specifically tuned to customer-specific device environments, subject to NRE and MOQ. Contact your regional Taoglas customer support team to request these services or additional support to integrate and test this antenna's performance in your device.
