SEA & LAND ELECTRONIC CORP.

Features Surface Mount Devices Lead free device Size 7.5'5.5 mm 0.29'0.20 inch Surface Mount packaging for automated assembly

Applications Almost anywhere there is a low voltage power supply, up to 60V and a load to be protected, including: Computer mother board, Modem. Telecommunication equipments.

Alpha-Top (Sea & Land Alliance)

SMD250L-30V

| Performance Specific | ation | | | | | | | | | | |
|---|------------------|-------------------|-------------------|-------------------|------------------|-----------------|----------------|--------------------------|-------------------|--------|----------|
| Model | V _{max} | I _{max} | I _{hold} | I _{trip} | \mathbf{P}_{d} | Maxi Time T | mum To Trip | Resis | stance | Agency | Approval |
| Moder | | | @25°C | @25°C | Тур. | Current | Time | Ri _{min} | R1 _{max} | UL | τυν |
| | (Vdc) | (A) | (A) | (A) | (W) | (A) | (Sec) | (Ω) | (Ω) | 01 | 101 |

| Ihold = Hold Current. | Maximum cu | rrent device w | ill not trip in 2 | 5°C still air. | | | | | | | |
| Itrip = Trip Current. M | /inimum curre | ent at which th | ne device will a | always trip in | 25°C still air. | | | | | | |
| Vmax = Maximum operating voltage device can withstand without damage at rated current (Imax). | | | | | | | | | | | |
| Imax = Maximum fau | It current dev | ice can withst | and without d | amage at rate | ed voltage (V | max). | | | | | |
| Pd = Power dissipat | tion when dev | rice is in the tr | ipped state in | 25°C still air | environment | at rated voltag | je. | | | | |
| Rimin/max = Minimun | n/Maximum d | evice resistan | ce prior to trip | ping at 25°C. | | - | | | | | |
| R1max = Maximum device resistance is measured one hour post reflow. | | | | | | | | | | | |
| CAUTION : Operation | beyond the sp | pecified rating | s may result i | n damage an | d possible are | cing and flame |). | | | | |

Environmental Specifications

| Test | Conditions | Resistance change |
|---|-----------------------------|-------------------|
| Passive aging | +85°C, 1000 hrs. | ±5% typical |
| Humidity aging | +85°C, 85% R.H. , 168 hours | ±5% typical |
| Thermal shock | +85°C to -40°C, 20 times | ±33% typical |
| Resistance to solvent | MIL-STD-202, Method 215 | No change |
| Vibration | MIL-STD-202, Method 201 | No change |
| Ambient operating conditions : - 40 °C to +85 °C | | |
| Maximum surface temperature of the device in the tripped stat | te is 125 °C | |

Agency Approvals :

Dimensions & Marking

 α = Trademark 250 = Hold current

Termination Pad Characteristics Terminal pad materials :

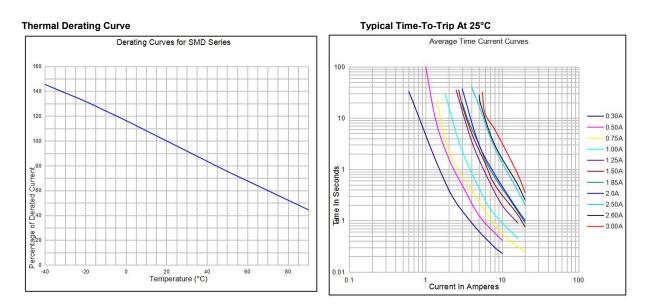

Terminal pad solderability :

Tin-plated Nickel-Copper

Meets EIA specification RS186-9E and ANSI/J-STD-002 Category 3.

Rework

Use standard industry practices, the removal device must be replaced with a fresh one.

ᡗ warning:

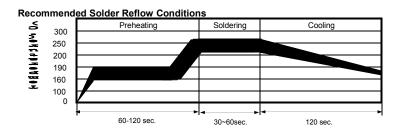

Use PPTC beyond the maximum ratings or improper use may result in device damage and possible electrical arcing and flame.

PPTC are intended for protection against occasional over current or over temperature fault conditions and should not be used when repeated fault conditions or prolonged trip events are anticipated. Device performance can be impacted negatively if devices are handled in a manner inconsistent with recommended electronic, thermal, and mechanical procedures for electronic components.

Use PPTC with a large inductance in circuit will generate a circuit voltage (L di/dt) above the rated voltage of the PPTC. Avoid impact PPTC device its thermal expansion like placed under pressure or installed in limited space.

Contaminator of the PPTC material with certain silicon based oils or some aggressive solvents can adversely impact the performance of the devices. PPTC SMD can be cleaned by standard methods. Requests that customers comply with our recommended solder pad layouts and recommended reflow profile. Improper board layouts or reflow profile could negatively impact solderability performance of our devices.

SMD250L-30V

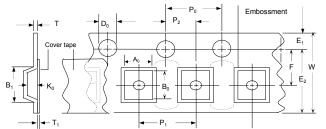

- Recommended reflow methods : IR, vapor phase oven, hot air oven. · Devices are not designed to be wave soldered to the bottom side
- of the board.
- Recommended maximum paste thickness is 0.25 mm (0.010 inch).
- Devices can be cleaned using standard method and solvents. Note: If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
