Quick Reference Guide
DYNAMIC Series

Dynamic Series is a broad product family that provides connector solutions ranging from signal level circuitry through power circuit connectivity in a ruggedized, industrialized package. The connector family is designed for use in control system applications and is suitable for a wide range of applications requiring high density, signal and power applications.

Dynamic Series consists of wire-to-board, wire-to-panel and wire-to-wire connectors with diverse housings available to meet most applications. Standard crimp and spring clamp variations of parts are available. The standardized contacts limit the amount of application tooling required.

PRODUCT APPLICATIONS

- Industrial Control
- Human Machine Interface (HMI)
- Data Communication
- Motion & Drives
- Production Equipment
- Robotics
- Servo Drives

- Elevator/Escalator
- Power Distribution
- Industrial Process Controls
- Factory Automation Computers
- Numeric Controllers
- Variable Frequency Drives
- Switching Power Supplies

RoHS Ready

TE connectivity

FEATURES YOU EXPECT FROM THE WORLD LEADER IN CONNECTIVITY SOLUTIONS

TE makes it a practice to maintain an inventory of preferred parts so orders can be fulfilled quickly. Even with specialty or custom orders, we work to reduce lead times to facilitate effective solutions within the desired timeframe.
High Performance Contact

- Large high performance contact area prevents chance of disconnection over time
- Box contact provides three points of contact to ensure the constant flow of electricity and minimizes costly downtime associated with contact failures
- Made of high conductivity material
- Gold plated versions available

Robust Housing Structure

- Vibration resistant designed to withstand the most demanding and inhospitable environments
- Full box housing design leads to long service life and great electrical integrity
- Robust retention legs and contacts provide additional strength, acting as a strain relief and ensuring reliability
- Clear visible circuit numbers

Secure & fast Installation

- Housings are keyed preventing mis-mating and mis-alignment, simplifying and reducing installation/ maintenance time in the field for service engineers
- Positive audible locking sound when inserting the connector provides assurance of positive mating
- Coordinated colors & designs on both headers, receptacle housings & tools prevents human errors and increases throughput during manufacturing processes

Flexibility

- Diverse housings and different position sizes support maximum design flexibility
- Tooling options available for semi-automated termination, as well as hand tools for field termination and repair

DYNAMIC SERIES FAMILY COVERS APPLICATIONS UP TO 65A WITH VARIETY OF SUB-CATEGORIES

Its platform design is suitable for a broad range of applications requiring low level signal through high current power circuits. The centralized wiring system saves time and money by offering a modular capability to expand as needed.

INTRODUCING OUR TECHNOLOGICAL ACHIEVEMENTS

DYNAMIC Series offers solutions for all your industrial control needs both inside and outside the cabinet in a ruggedized, industrialized package.

SMT Type

DYNAMIC SMT connectors are designed to meet the growing demand for a reliable, low cost, reflow solder capable part. Special designed retention legs increase the strenght on the circuit board. The SMT type can withstand a maximum temperature of 245°C.

| Surface Mount Technology (SMT)-Type	Part Number
D1100D – Board Mounted Header Assembly (26 Pos.)	1-1939995-3
D1100D – Receptacle Housing (26 Pos.)	1-1827863-3

x600 – Hybrid Type

DYNAMIC Hybrid connectors combine power and signal lines which can dramatically improve productivity by reducing assembly steps. Along with being able to mate different size wires at one time, it contributes to more compact size and makes maintenance more efficient.

| Dynamic 2600 Hybrid	Part Number
D2600 – Board Mounted Header Assembly (48 Pos.)	1827538-1
D2600 – Receptacle Housing (48 Pos.)	1827540-1

x900 – Spring Clamp Type

DYNAMIC spring clamp version is a screw-less, crimp-less connector. Comparing it with traditional crimping types of Dynamic, the spring clamp brings the customer a quick on-site connection with no need for crimp tooling. This is necessary for some applications where the end user must do the wiring. It provides installers a quick and easy way to terminate wires in the field which saves both time and labor. Moreover, the DYNAMIC spring clamp version has all the similar features of the existing crimp type including keying, audible locking and vibration resistance.

3900 Spring Clamp Connector*	Part Number
3900 Board Mount Header 10 Pos. X Keyed	1-2013519-0

Questions that will help you better select the product that you need:

What are the current and voltage requirements for your applications?
The Dynamic series connector family has different series that can handle between 3 and 65 amps as well as 125 volts up to 630 volts depending on the series

What is the operating temperature range for your applications?
The Dynamic Series connectors all have an operating range of -55 °C to +105 °C

Will you need additional keying configurations?
The Dynamic series are available in x,y,z,xx,yy,xy keying configurations to suit your needs.

Do you need the ability to move equipment for inspection or line changes?
The Dynamic series connectors all feature quick attach and detach housings that produce an audible click when mated. This allows for equipment to be quickly changed and removed for inspection.

Would you prefer to install wires directly into the housing instead of using crimping tools?
The Dynamic series offers both the 1900 and 3900 series which are both spring clamp versions. These versions negate the need for crimp tooling and operations. In development now are the 5900 and 2900 respective spring clamp versions of 5000 and 2000 series. Also in development is the 3950, which is the new version of the 3900 spring clamp parts.

Do you need a connection that is rugged and vibration resistant?
The Dynamic series is an extremely rugged connector family and features full box contacts with 3 points of contact for high electrical reliability.
