

## Introducing Low Insertion Force FASTON Terminals

TE Connectivity (TE) FASTON terminals and connectors have been the industry leader in the appliance and automotive industries for years. TE continues to reinvent the FASTON product line to meet the changing trends in these industries. We have seen the need for terminals with lower insertion forces for improved ergonomics so TE is proud to introduce several new products specifically designed to meet these applications. These new products come with the same strong engineering support and high quality that TE has provided for over 50 years.

## High Temperature Low Insertion Force Receptacles

- Nickel plated steel terminals
- “Dog bone” design allows tab to slide on rolled edges
- Terminals rated up to 250 °C. Housings on pre-insulated Ultra-Pod rated up to 150 °C
- Can be used with high temperature FASTON housings
- UL recognized
- Max insertion force 8 lbs.

## Brass Low Insertion Force Receptacles

- Brass and tin plated brass terminals
- .250 x .032 mating interface (6.35 x .081)
- Stock thickness .016 (0.41)
- Redesign of the Budget style terminal
- Max insertion force ≤ 6 lbs
- Ultra-Pod receptacles use a V-0, 130 °C raw material
