

## Features

- Sealed housing conforms to IP6K9K
- Robust design
- 6 G shock and 4 G vibration resistant
- Main contact current rated for continuous current and 100\% duty cycle
- Battery disconnect under load in case of an emergency
- Variable or scalable mounting options
- Safety in the vehicle service by so called "LOCK" options

## Applications

- Truck
- Bus
- Ground support vehicles
- Construction and agricultural vehicles
- Railway
- Aircraft

## BATTERY DISCONNECTOR

## Series 35 / 500A - from TE Connectivity (TE)

Our manually operated battery disconnector up to 500 amps meets the most demanding requirements in all vehicle applications. The nominal current ratings refer to continuous DC current at up to $100 \%$ duty cycle and the switches are built to switch under full load.
TE Connectivity's (TE) battery disconnector can handle up to five times the continuous current level for up to 10 seconds as overload current. (Overload current of 1000 amps for 30 seconds)
All series 35 battery disconnectors are sealed with a technology that meets the IP67 and IP6K9K (steam cleaning) standards and the switches are designed to operate at temperatures between $-40^{\circ} \mathrm{C}$ and $+85^{\circ} \mathrm{C}$.

Options include single or dual pole configurations, various mounting and locking (security) alternatives as well as different shapes and colors of the operating handles.
Battery disconnectors from our KISSLING product family are able to be operated under fall load, to ensure a safe disconnection from the battery in emergency conditions. The range also has optional protection against theft or unauthorized use of vehicles or equipment by removable or lockable operating elements.

| Specification |  |
