Note 1: Jumper required if only SPST power switch is used
Note 2: Jumpers required if no input filtering is used
Note 3: Use only 120 V and 240 V positions for 2 volt selection units

## Voltage Selection

Open cover door and slide fuse-pull lever to left. Select operating voltage by orienting voltage selection card with the desired voltage on top left side. Push card firmly into module slot. Slide fuse-pull lever to right into normal position and re-insert fuse into holders.

Use caution in selecting correct fuse value
