# Transformers...Questions and Answers

## What is a Transformer?

A transformer is a passive electrical device which is designed to change one AC voltage to another by magnetic induction. It "steps-up" or "steps-down" voltage in order to match incoming supply voltage from the utility to the voltage required by the user's end product. Typical USA supply voltages are 120, 208, 240, 277, 480 (and 575 in Canada). Common International voltages include 110, 220, 380, and 415.

## What is an Isolation Transformer?

An isolation transformer is a transformer whose primary and secondary windings are separate for the purpose of isolating the circuit from the supply source.

## What is an Autotransformer?

An autotransformer has only one winding, which is shared by the primary and secondary circuits. Autotransformers do not provide isolation but offer a substantial savings when used to obtain small increments of voltage above or below the input voltage.

## What is a Class II Transformer?

A Class II transformer is used to supply Class II circuits. Class II transformers have a maximum VA (Volt-Ampere) rating of less than 100 and a maximum secondary output of 30 VAC. The maximum VA generally offered is 75 and the most common secondary voltage is 24 VAC. No load secondary voltage may be as high as 29 VAC. All Class II transformers are either inherently or non-inherently limited. This means that the maximum output current of the transformer is limited, either by the intrinsic coil impedance or by a fuse or circuit breaker. These transformers are designed to meet the requirements of U.L. 1585.

Inherently Energy Limited Transformers - Class II transformers up to 50 VA are "Inherently Limited" which means that the transformer, if overloaded, will short itself out and fail safely, *not requiring a fuse*.

Non-Inherently Energy Limited Transformers - 60 thru 75 VA Class II transformers are generally *protected by a resettable circuit breaker or a fuse* within the transformer secondary. Without this overload protection, the transformer would not satisfy the safety requirements for a Class II circuit.

## What is a General Purpose Transformer?

General purpose transformers include any VA rating along with primary and secondary voltage ratings up to 600 VAC. *Although internal fusing is an option, no fusing is required.* However, applicable U.L. specifications may require fusing in the end product. These transformers are designed to meet the requirements of U.L. 506.

## What is Voltage Regulation?

Voltage regulation is the percent of change in the output voltage when the load is reduced from full load to no load while the input voltage remains constant.

## What is the effect of a load on a control transformer?

A control transformer is designed to provide rated output voltage at full VA. As the load decreases, the output voltage will go up. Conversely, increases in load will result in lower output voltages. Typically, the smaller the VA size of the unit, the greater difference there is between no-load and full-load voltage.

## Part Numbering System

This chart illustrates a breakdown of our part numbering system on a few of our most popular models. Consult factory for your specific requirements.

Typical Part No. ▶		4000	-	01	E	07	BB	999
<b>1. Series:</b>		4000 = Class II (UL 1585) inherently protected or internally fused.		4500 = Autotransformer.				
		4001 = Class II (UL 1585) externally fused.		4600 = 60 Hz. only				
		4100 = No UL or CSA approval.		4700 = General Purpose (UL 506).				
<b>2. Packaging:</b>								
- = Bulk Pack		Y = Individual Box						
<b>3. Primary and Secondary Voltages:</b>								
	Primary V	Secondary V		Primary V	Secondary V			
01 =	120	24	09 =	208/240	24			
02 =	240	24	13 =	208/240/480	24			
03 =	277	24	20 =	120	12			
04 =	480	24	51 =	380/415	24			
05 =	120/208/240	24	78 =	575	24			
<b>4. VA and Series Dimension:</b>								
	VA Rating	Series Size		VA Rating	Series Size			
A =	10	3/4" (19.05mm)	AW =	50	7/8" (22.22 mm)			
C =	20	3/4" (19.05mm)	L =	60	15/16" (23.81mm)			
M =	30	3/4" (19.05mm)	J =	75	15/16" (23.81mm)			
E =	40	7/8" (22.22 mm)	K =	100	1 1/4" (31.75mm)			
V =	40	3/4" (19.05mm)	Z =	150	1 1/4" (31.75mm)			
<b>5. Stack Thickness and Fusing (Generally determined at factory):</b>								
19 = 0.5" (12.7mm) thick.		07 = 0.875" (22.225mm) thick.		15 = 1.00" (25.4mm) thick.				
02 = 0.625" (15.875mm) thick.		04 = 1.00" (25.4mm) thick.		18 = 1.25" (31.75mm) thick.				
<b>6. Mounting and Termination:</b>								
	Mounting	Termination		Mounting	Termination			
K =	Foot Mount	Leads	AE =	Foot Mount	QCs on Top			
BC =	4" (101.6mm) foot	Screw / Leads	BB =	Foot Mount	QCs on One Side			
G =	Panel Mount	Leads	AB =	Foot Mount	QCs on Other Side			
<b>7. Customer ID Suffix:</b>								
000-999 = Factory assigned customer ID								

Example: 4000-01E07BB999 This part number is a Class II transformer with a 120V primary and 24V secondary. It is 40VA and inherently energy limited. This is a foot mount transformer with quick connect terminals (line & load) exiting out of the same side of the transformer cover.

Note: This is a partial listing only. Consult factory for your specific requirements. All combinations of voltage and VA may not be available.

# Custom Transformer Capabilities

In addition to our industry leading standard transformer series (see the following pages), We have a proven track record of being an innovative leader in custom transformer designs. We specialize in working with our customers in the initial stages of their design process, offering ideas and suggestions which lead to a transformer product that can be manufactured with the lowest *Defective Parts Per Million (DPPM)* levels and at the highest value to the customer. The following is a list of guidelines for transformer products which compliment our Demand Flow Manufacturing system.

**Leaded Transformers - Quick Connect Transformers - PC Mount Transformers - Inductors**

- 5 VA through 400 VA
- Spray on rust preventative
- Butt stack and weld lamination construction
- Molded bobbin construction
- Numerous welded bracket options
- Molded cover with integral strain relief for lead or quick connect terminal

When a transformer fits the above criteria and the customer is willing to share in the design process with us, we can both benefit from *Design For Manufacturing (DFM)*, as demonstrated in the following example:

**Traditional Method**

- DPPM level >2000
- 10 Week lead time
- 3 Part numbers
- 12 Inventory turns
- Costly
- Fragile design

**DFM Method**

- DPPM level <100
- 1 Week lead time
- 1 Universal part number
- 50 Inventory turns
- 20% Cost improvement
- Robust design

Our electrical and mechanical design groups are ready to work with you on your specific product needs.

# 4000 series

## Class II UL 1585 Transformer 5 VA - 30VA Inherently Energy Limited No Secondary Fusing Required Wire Leads

cULus File E87824

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Type K Foot Mount - features a steel bracket welded to the bottom of the laminations for easy mounting.
- Type G Panel Mount - features .179" (4.55 mm) diameter holes in each corner to allow direct mounting to a panel.
- Multiple voltage combinations are available. Consult factory for availability.

### Standard "999" Models Available

Primary V	Secondary V	20VA
120	24	4000-01C02K999
120	24	4000-01C02K999

For more details about standard models see Part Numbering System table at beginning of transformer section in this catalog .

## Class II UL 1585 Transformer 10VA - 30VA Inherently Energy Limited No Secondary Fusing Required Quick Connect Terminals

**UL** File E87824

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Type BB Same Side Termination - features quick connect terminals with line and load terminations on the same side of transformer.
- Type AE Laydown Termination - features quick connect terminals with line and load terminations on the top of transformer.
- Type AB Opposite Side Termination - features quick connect terminals with line and load terminations on opposite sides of transformer.
- Multiple voltage combinations are available. Consult factory for availability.

### Specifications

**Terminals:** Standard male quick connects are .250" x .032" (6.35 x .81 mm). Other available quick connects include .187" x .032" (4.75 x .81 mm) and .187" x .020" (4.75 x .51 mm).

**Frequency:** 50/60 Hz.

**Insulation Class:** UL Class B (130°C).

**Weight:** 10VA - 10.9 oz. (308 g); 20VA - 14.1 oz. (399 g); 30VA - 18.6 oz. (525 g).

### Standard "999" Models Available

No standard models are offered.

For more details about standard models see Part Numbering System table at beginning of transformer section in this catalog .

# 4000 series

## Class II UL 1585 Transformer 20VA - 40VA Inherently Energy Limited No Secondary Fusing Required Plate for Electrical Box Mounting

**UL** File E87824

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Type BC Plate Mount - mounted on a 4" (101.6mm) square plate designed to fit a standard 4" (101.6mm) square electrical box.
- The line voltage is connected inside the electrical box to the color-coded leads on the transformer. The low voltage is terminated to either 1/4" (4.75 mm) quick connects and/or #6-32 screw furnished on the secondary side.
- Multiple voltage combinations are available. Consult factory for availability.

### Standard "999" Models Available

Primary V	Secondary V	20VA	40VA
120	24	4000-01C02BC999	4000-01V18BC999

For more details about standard models see Part Numbering System table at beginning of transformer section in this catalog .

### Specifications

- Wire Size:** All leads are 18 AWG stranded 2/64" (.794 mm) insulation thickness. Standard parts have 12" (305 mm) total length with 1/2" (12.7 mm) strip.
- Frequency:** 50/60 Hz.
- Insulation Class:** UL Class B (130°C).
- Weight:** 20VA - 19.2 oz. (544 g); 40VA - 32 oz. (906 g).

## Class II UL 1585 Transformer 60VA -75VA Non-Inherently Energy Limited Secondary Fusing Required Wire Leads

**File E87824**

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Type K Foot Mount - features a steel bracket welded to the bottom of the laminations for easy mounting.
- Type G Panel Mount - features .218" (5.54 mm) diameter holes in each corner to allow direct mounting to a panel.
- For agency approval, 60 & 75VA transformers must have one of the following overcurrent protectors in series with the secondary winding: Internal fuse, integral circuit breaker. Any customer-supplied fusing or protection must be approved by the factory.
- Multiple voltage combinations are available. Consult factory for availability.

### Standard "999" Models Available

Primary V	Secondary V	75VA
120	24	4000-01J15K999
277	24	4000-03J15K999
208/240	24	4000-09J15K999
575	24	4000-78J15K999
120/208/240/480	24	4000-08J15K999

For more details about standard models see Part Numbering System table at beginning of transformer section in this catalog . All 75VA standard models come with an integral circuit breaker.

### Specifications

**Wire Size:** All leads are 18 AWG stranded 2/64" (.794 mm) insulation thickness. Standard parts have 12" (305 mm) total length with 1/2" (12.7 mm) strip.

**Frequency:** 50/60 Hz.

**Insulation Class:** UL Class B (130°C).

**Weight:** 60VA – 35.2 oz. (997 g); 75VA – 38.4 oz. (1087 g).

## Class II UL 1585 Transformer 60VA -75VA Non-Inherently Energy Limited Secondary Fusing Required Quick Connect Terminals

**UL** File E87824

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Type BB Same Side Termination - features quick connect terminals with line and load terminations on the same side of transformer.
- Type AE Laydown Termination - features quick connect terminals with line and load terminations on the top of transformer.
- For agency approval, 60 & 75VA transformers must have one of the following overcurrent protectors in series with the secondary winding: Internal fuse, integral circuit breaker. Any customer-supplied fusing or protection must be approved by the factory.
- Multiple voltage combinations are available. Consult factory for availability.

### Standard "999" Models Available

Primary V	Secondary V	75VA
120	24	4000-01J15AE999
208/240	24	4000-09J15AE999

For more details about standard models see Part Numbering System table at beginning of transformer section in this catalog. All 75VA standard models come with an integral circuit breaker.

### Specifications

**Terminals:** Standard male quick connects are .250" x .032" (6.35 x .81 mm). Other available quick connects include .187" x .032" (4.75 x .81 mm) and .187" x .020" (4.75 x .51 mm).

**Frequency:** 50/60 Hz.

**Insulation Class:** UL Class B (130°C).

**Weight:** 60VA – 35.2 oz. (997 g); 75VA – 38.4 oz. (1087 g).

## UL 506 Transformer 60VA - 150VA Non-Fused Wire Leads or Quick Connects

**UL** File E102980

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Type K Foot Mount - features wire leads and a steel bracket welded to the bottom of the laminations for easy mounting.
- Type BB Same Side Termination - features quick connect terminals with line and load terminations on the same side of transformer.
- Multiple voltage combinations are available. Consult factory for availability.

### Specifications

- Wire Size:** All leads are 18 AWG stranded 2/64" (.794 mm) insulation thickness. Standard parts have 12" (305 mm) total length with 1/2" (12.7 mm) strip.
- Terminals:** Standard male quick connects are .250" x .032" (6.35 x .81 mm). Other available quick connects include .187" x .032" (4.75 x .81 mm) and .187" x .020" (4.75 x .51 mm).
- Frequency:** 50/60 Hz.
- Insulation Class:** UL Class B (130°C).
- Weight:** 60VA – 36.8 oz. (1042 g); 100VA – 80 oz. (2270 g); 150VA – 83.2 oz. (2356 g).

# 57 series

## Transformer Relay for HVAC Applications

**UL** File E113772

Users should thoroughly review the technical data before selecting a product part number. It is recommended that users also seek out the pertinent approvals files of the agencies/laboratories and review them to ensure the product meets the requirements for a given application.

### Features

- Cover mounts on conventional 4" square box.
- All leads terminate in the box.
- Leads are 8" (203.2 mm) long with 1/2" (12.7mm) stripped
- Standard transformer is 40VA Class II Energy Limited. Other transformers are available.
- Five secondary terminations (two are hot) for thermostat connection and #6-32 screw termination is standard. Quick connects are optional.
- Assembled with choice of 9100 or 9400 series relays.
- Custom-built to meet customer requirements.

### Relay Data @ 25°C

**Arrangements:** 1 Form A (SPST-NO) through 2 Form C (DPDT), depending upon relay selected

**Rating:** 9100 Series Relay: 12 FLA, 60 LRA, 15A resistive @ 125VAC;  
6 FLA, 36 LRA, 15A resistive @ 240VAC;  
3/4 HP @ 125/250VAC.

9400 Series Relay: 12 FLA, 60 LRA, 18A resistive @ 125VAC;  
8 FLA, 48 LRA, 18A resistive @ 240VAC.

### Specifications

**Insulation Class:** UL Class B (130°C).

**Duty Cycle:** Continuous.

**Weight:** 32 oz. (909 g) approximately

### Ordering Information

57 series products are custom-built. Your Tyco Electronics sales engineer will need to consult with the factory to develop a model meeting your needs.

### Standard part numbers listed below are more likely to be available from stock.
