

# **Type CRGP Series**

**Key Features** 

**Key Features** 

Small size and light weight

Suitable for both wave and reflow soldering techniques

Supplied on tape

**Pulse Rated** 

7 different package sizes

Terminal finish matte Sn over Ni

AEC-Q200 Compliant

TE Connectivity is pleased to introduce this SMD Pulse withstand thick film Chip resistor, suitable for auto placement in volume and for most applications. Available in five different packages and supplied on tape and reel for automatic insertion processes. Standard values – E24 Series and now AEC-Q200 Qualified

## **Characteristics – Electrical**

# Power derating curve

Power rating based on continuous load operation in ambient temperature of 70°C. For resistors operated in ambient temperatures above 70°C, power rating must be derated in accordance with this curve.

### Marking:

E24 series 0603 – 2512 3 Digits – first two digits denote significant figures of resistance and third digit denotes number of zeros thereafter. EG

9-1773463-9 Rev. B 07/2021

Dimensions in millimetres unless otherwise specified Dimensions Shown for reference purposes only. Specifications subject to change

Marking for E96 Series 0805 – 2512 4 digits – First three digits denote significant figures of resistance and fourth digit denotes number of zeros thereafter. EG.

For ohmic values below 100R letter "R" denotes decimal point. EG

0402 size chips are not marked

0603 E96 3 digit marking.

#### **Pulse withstand capacity**

The single impulse graph is the result of 50 impulses of rectangular shape applied at one-minute intervals. The limit of acceptance was a shift in resistance of less than 1% from the initial value. The power applied was subject to the restrictions of the maximum permissible impulse voltage graph shown.

#### **Environment Related Substance**

This product complies to EU RoHS directive, EU PAHs directive, EU PFOS directive and Halogen free.

#### Ozone layer depleting substances.

Ozone depleting substances are not used in our manufacturing process of this product.

This product is not manufactured using Chloro fluorocarbons (CFCs), Hydrochlorofluorocarbons (HCFCs), Hydrobromofluorocarbons (HBFCs) or other ozone depleting substances in any phase of the manufacturing process.

#### **Storage Condition**

The performance of these products, including the solderability, is guaranteed for a year from the date of arrival at your company, provided that they remain packed as they were when delivered and stored at a temperature of  $25^{\circ}$ C  $\pm$   $10^{\circ}$ C and a relative humidity of 60%RH  $\pm$  10%RH, chemical and dust free atmosphere

Even within the above guarantee periods, do not store these products in the following conditions otherwise, their electrical performance and/or solderability may be deteriorated, and the packaging materials (e.g. taping materials) may be deformed or deteriorated, resulting in mounting failures.

1. In salty air or in air with a high concentration of corrosive gas, such as Cl2, H2S, NH3, SO2, or NO2

2. In direct sunlight

## **Solder Profile**

Wave soldering condition: (2 cycles Max.)

Pre-heat : 100 ~ 120 °C, 30 ± 5 sec.

Suggestion solder temp.: 235 ~ 255 °C, 10 seconds

Peak temp.: 260 °C

Reflow soldering condition: (2 cycles Max.)

Pre-heat : 150 ~ 180 °C, 90 ~ 120 sec.

Suggestion solder temp.: 235 ~ 255 °C, 20 ~ 40 seconds

Peak temp.: 260 °C

Hand Soldering condition: The Soldering iron tip should be less than 300°C and maximum contact time should be 5 seconds
