

ES1000

Semirigid, adhesive-lined heat-shrinkable tubing (extended temperature range)

Clear, adhesive-lined ES1000 heat-shrinkable tubing is specifically designed for environmental sealing and electrical insulation of wire splices, terminations, and components where see-through inspection is required.

ES1000 tubing has an outer jacket of radiation-crosslinked, semirigid polyolefin. The jacket is mechanically tough, providing strain relief and abrasion protection of wire splices and mechanically sensitive components. The inner layer of the tubing is a unique hot-melt adhesive, specially formulated to seal to most types of commercial wire insulation, and to perform well at an extended temperature range. The thick adhesive forms an effective barrier against fluids and moisture, helping to protect the harness from the effects of corrosion and water wicking. Because ES1000 tubing has a high shrink ratio, only a few sizes are needed to cover a wide range of splice and component diameters. ES1000 tubing dimensions have been engineered to provide lowcost sealing solutions on multiplewire splices (up to seven wires per side), using standard Raychem application equipment.

Temperature rating

Full recovery temperature:	135°C	
Continuous operating temperature:	-40°C to 130°C

**Wall thickness will be less if tubing recovery is restricted during shrinkage.

Ordering information

Color	Clear	
Size selection	Always order the largest size that will shrink snugly over the component being covered.	
Standard packaging	Cut pieces. See reverse for information on standard cut lengths.	
Marking	Tubing will be marked with the number size (for example, ES-1, ES-2, ES-3, or ES-4).	
Ordering description	Specify product name, size, color, and cut length; for example, ES1000-No.2-X-50MM (X=Clear).
