## Applications JJ Series - Detector Switches

- Automotive
- Instrumentation
- White goods
- Telecommunications

## Benefits

- RoHS Compliant
- Halogen and Lead Free
- Sharp detection feeling
- Compact Size

TE Connectivity is pleased to introduce its JJ Series of Detector Switches, suitable for a wide variety of applications given their several presentations ranging from horizontal or vertical actuated options as well as Gull-winged, J-leaded and Through-Hole mounting possibilities.

The Detector Switches will be offered in a wide range of sizes giving the possibility for countless applications going from automotive to telecommunications.

## JJ Series - Family Classification

| Series | Body Size |
| :---: | :---: |
| JJA | $3.5 \times 2.8 \mathrm{~mm}$ |
| JJB | $3.5 \times 2.98 \mathrm{~mm}$ |
| JJC | $3.5 \times 3.3 \mathrm{~mm}$ |
| JJD | $4.2 \times 3.6 \mathrm{~mm}$ |
| JJE | $4.7 \times 3.5 \mathrm{~mm}$ |
| JJF | $4.7 \times 3.8 \mathrm{~mm}$ |
| JJG | $5.7 \times 4.0 \mathrm{~mm}$ (High-Rating) |
| JJH | $5.7 \times 4.0 \mathrm{~mm}$ (Standard-Rating) |
| JJI | $5.0 \times 4.4 \mathrm{~mm}$ |
| JJJ | $6.0 \times 4.85 \mathrm{~mm} / 5.5 \times 4.7 \mathrm{~mm}$ |
| JJK | $6.3 \times 3.0 \mathrm{~mm}$ |
| JJL | $6.5 \times 3.9 \mathrm{~mm}$ |
| JJM | $5.7 \times 4.0 \mathrm{~mm}$ |
| JJN | $5.7 \times 4.0 \mathrm{~mm}(\mathrm{Wedge})$ |
| JJO | $10.0 \times 3.8 \mathrm{~mm}$ |
| JJP | $10.6 \times 10.0 \mathrm{~mm}$ |

## 1. Style

"Detector Switches" are mainly used as signal switches of electric devices, with the general requirements of mechanical and electrical characteristic.
1.1 Operating Temperature Range: $-10^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$
1.2 Storage Temperature Range: $-30^{\circ} \mathrm{C}$ to $80^{\circ} \mathrm{C}$
1.3 The shelf life of product is within 6 months.
2. Current Range: $100 \mathrm{~mA}, 5 \mathrm{VDC}$
3. Type of Actuation: Auto Return
4. Test Sequence:

|  | Item | Description | Test Conditions | Requirements |
| :---: | :---: | :---: | :---: | :---: |
| Appearance | 1 | Visual Examination | Physical inspection without applying any external forces. | There shall be no defects that affect the serviceability of the product. |
| Electric Performance | 2 | Contact Resistance | Actuate the switch ( 6.8 mm ) and measure contact resistance using a microOhmmeter. | 1) Initial: $500 \mathrm{~m} \Omega$ Max. <br> 2) After each test: $1 \Omega$ Max. |
|  | 3 | Insulation Resistance | Measurements shall be made at 500 VDC potential between terminals and cover. | 1) Initial: $100 \mathrm{M} \Omega$ Max. <br> 2) After moisture resistance test: $1 \mathrm{M} \Omega \mathrm{Min}$. |
|  | 4 | Dielectric Withstanding Voltage | Apply $300 \mathrm{VAC}(50 \mathrm{~Hz}$ or 60 Hz ) between terminals and cover for 1 minute. | There shall be no breakdown or flashover |

| Mechanical <br> Performance | 5 | Operating Force | Applying force to the center of the stem for 6.8 mm | 50gF Max. (0.49N Max.) |
| :---: | :---: | :---: | :---: | :---: |
|  | 6 | Terminal Strength | A static load of $4.9 \mathrm{~N}(500 \mathrm{gF})$ shall be applied to the tip of terminal in the desired direction for 15 sec . | 1) Shall be free from terminal looseness and damage terminal may be bent. <br> 2) Electrical characteristics of Items 2 to 4 shall be satisfied. |
|  | 7 | Control <br> Strength | 1) A static load of 9.8 N ( 1 KgF ) shall be applied in the operating direction of the control unit for 15 seconds. <br> 2) A static load of $2.94 \mathrm{~N}(0.3 \mathrm{KgF})$ shall be applied in the vertical direction of operation for 15 seconds. | 1) Shall be free from mechanical and electrical abnormalities. <br> 2) Electrical characteristics of Items 2 to 4 shall be satisfied. |
|  | 8 | Solderability | Test each sample switch under the following conditions: <br> 1) Solder bath temperature $230 \pm 5^{\circ} \mathrm{C}$ <br> 2) Dipping time $3 \pm 0.5 \mathrm{sec}$ | *90\% or more of immersion area shall be covered with new solder. |
|  | 9 | Vibration | 1) Vibration frequency range: 10 to 50 Hz <br> 2) Total amplitude: 1.5 mm <br> 3) Sweep ratio: 1 min <br> This motion shall be applied for a period of 2 hours in each of 3 mutually perpendicular axes. |  |
| Durability | 10 | Operating Life | Tested as follows: <br> 1) Without load: <br> 100,000 cycles operations at a rate of $31.5 \mathrm{~mm} / \mathrm{sec}$ ( 15 cycles per minute) for Max. stroke without load. <br> 2) With load: <br> 100,000 cycles operations at a rate of 15 to 20 cycles per minute for max stroke with load of rated voltage and current (5VDC 1mA). | 1) Electrical characteristics: <br> As shown on item 2 to 4 <br> 2) Mechanical characteristics: <br> As shown on item 5 to 7 |
| Weather-proof | 11 | Temperature cycling | The switch shall be subjected to 10 successive changes of temperature cycles. <br> Then leave the switch at normal temperature and humidity for 2 hours after which measurement shall be made within 1 hour. <br> 1) $-30 \pm 3^{\circ} \mathrm{C}$ for 30 min . <br> 2) Normal temperature 10 to 15 Min . <br> 3) $70 \pm 2^{\circ} \mathrm{C}$ for 30 min . <br> 4) Normal temperature 10 to 15 min . |  |

For Email, phone or live chat, go to: www.te.com/help

| Weatherproof | 12 | Resistance Low Temperature | Following the test set forth below the sample shall be left in normal temperature and humidity conditions for 1 hour before the measurements are made: <br> 1) Temperature: $-30 \pm 3^{\circ} \mathrm{C}$ <br> 2) Time: 168 hours <br> Water drops shall be removed. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 13 | Heat Resistance | Following the test set forth below the sample shall be left in normal temperature and humidity conditions for 1 hour before the measurements are made: <br> 1) Temperature: $85 \pm 2^{\circ} \mathrm{C}$ <br> 2) Time: 168 hours <br> Water drops shall be removed. | 1) Electrical characteristics: As shown on item 2 to 4 <br> 2) Mechanical characteristics: As shown on item 5 to 7 |
|  | 14 | Humidity Resistance | Following the test set forth below the sample shall be left in normal temperature and humidity conditions for 1 hour before the measurements are made: <br> 1) Temperature: $60 \pm 2^{\circ} \mathrm{C}$ <br> 2) Relative Humidity: 90 to $95 \%$ <br> 3) Time: 168 hours <br> Water drops shall be removed. |  |
|  | 15 | Salt mist | Switch shall be checked after the following test: <br> 1) Temperature: $35 \pm 2^{\circ} \mathrm{C}$ <br> 2) Salt saturation: $5 \pm 1 \%$ (Solids by weight) <br> 3) Duration: 22 hours <br> 4) After the test, salt deposit shall be removed in running water not warmer than $37.8^{\circ} \mathrm{C}$ <br> 5) The testing repeat is 3 cycles. | No remarkable corrosion shall be recognised in metal part. |
| Mechanical Performance | 16 | Resistance to Soldering Heat | Test each sample switch under the following conditions. <br> 1) Reflow soldering: <br> -The switch shall be stored at a temperature of $150 \pm 2^{\circ} \mathrm{C}$ for 3 min and stored at a temperature of $230 \pm 2^{\circ} \mathrm{C}$ for 1 min . <br> -The switch is maintained at ordinally temperature and measurement shall be made. <br> 1) Manual soldering: <br> -Bit temperature $350^{\circ} \mathrm{C}$ <br> -Application time 3sec Max. | 1) Electrical characteristics: As shown on item 2 to 4 <br> 2) Mechanical characteristics: As shown on item 5 to 7 |
|  | 17 | Chattering (Bounce) | Several times of operation to the total travel position shall be performed at a speed of $10 \mathrm{~mm} / \mathrm{sec}$ Chattering (Bouncing) shall be applied to the voltage change time more than 1V. | Chattering t 1 and t 3 shall be less then 8 msec . <br> Bouncing t2 shall be less than 8 msec . <br> In the case of two or more bounces, the total time of bounces shall be less then 8 msec . |

## 5. Soldering Conditions:

- Recommended Soldering Profile for the JJP Series

■ ■ The temperatures defined above are the temperatures measured on the surface of the Printed Circuit Board. There are cases where the printed circuit board's temperature differs greatly from the temperature of the switch. Critical note: the switch's surface temperature must not exceed $260^{\circ} \mathrm{C}$.

■ Auto Soldering
Preheat: $150^{\circ} \mathrm{C}$ to $175^{\circ} \mathrm{C}, 40$ to 80 (sec)
Soldering area temperature: $260^{\circ} \mathrm{C}$, 1 to 4 (sec), 2 times Max.

- Precautions in Handling

1. Care must be taken to ensure excess flux on the top surface of the printed circuit board does not adhere to the switch.
2. Do not wash the switch.

- Recommended storage conditions:

Store the products in the original packaging material. After opening the package, the remaining products must be stored in the appropriate moisture-proof \& airtight environment.

Do not store the switch in the following environment or it may affect performance and solderability:

1. temperatures below $-10^{\circ} \mathrm{C}$ to $40^{\circ} \mathrm{C}$ \& humidity at $85 \%$ (min)
2. environment with corrosive gas
3. storage over 6 months
4. place in direct sunlight
