Tyco are the leading European supplier of standard and custom desianed aluminium housed resistors for general-purpose use, power supplies, power generation and the traction industry.

The THS is a range of extremely stable, high quality wire wound resistors capable of dissipating high power in a limited space with relatively low surface temperature. The power is rapidly dissipated as heat through the aluminium housing to a specified heatsink. The resistors are made from quality

materials for optimum reliability and stability. Tyco can test resistors to conform to relevant international, MIL or customer specifications.

For improvements in long-term stability, resistors must be derated as follows; for 50% of stated  $\Delta R$  maximum dissipation must not exceed 70% of rating; for 25% of stated  $\Delta R$  maximum, dissipation must not exceed 50% of rating Long Term Stability: Insulation Resistance: Dry: 10,000M $\Omega$  minimum. After moisture test: 1000M $\Omega$  minimum. Although the use of proprietary heat sinks with lower thermal resistance is acceptable, up rating is not recommended. The use of proprietary heat sink compound to improve thermal Heat Dissipation: conductivity is recommended for optimum performance of all sizes Specification: Temperature coefficient below 100R, 50ppm/°C Temperature coefficient above 100R, 30ppm/°C Tolerance, 5% standard
