TOSHIBA CMOS Digital Integrated Circuit Silicon Monolithic

TC74HC237AP, TC74HC237AF

3-to-8 Line Decoder/Latch

The TC74HC237A is a high speed CMOS 3-to-8 LINE DECODER ADDRESS LATCH fabricated with silicon gate C2MOS technology.

It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.

It is composed of a 3-bit input latches with a common $\overline{GL}$ enable input and 3-to-8 line decoder with enable inputs G1 and $\overline{G2}$. The 3-bit binary data is stored into the input latch on the high level of $\overline{GL}$. The value of this data determines which one of the outputs will go low.

When the enable input G1 is held low or $\overline{G2}$ is held high, decoding function is inhibited and all the 8 outputs go high. The two enable inputs are provided to ease cascade connection and permits the application address decoder for memory system.

All inputs are equipped with protection circuits against static discharge or transient excess voltage.

DC output voltage	V_{OUT}	−0.5 to V_{CC} + 0.5	V

Power dissipation	P_D	500 (DIP) (Note 2)/180 (SOP)	mW
Storage temperature	T_{stg}	−65 to 150	°C

Note 1: Exceeding any of the absolute maximum ratings, even briefly, lead to deterioration in IC performance or even destruction.
Using continuously under heavy loads (e.g. the application of high temperature/current/voltage and the significant change in temperature, etc.) may cause this product to decrease in the reliability significantly even if the operating conditions (i.e. operating temperature/current/voltage, etc.) are within the absolute maximum ratings and the operating ranges.
Please design the appropriate reliability upon reviewing the Toshiba Semiconductor Reliability Handbook (“Handling Precautions”/“Derating Concept and Methods”) and individual reliability data (i.e. reliability test report and estimated failure rate, etc).

Note 2: 500 mW in the range of Ta = −40 to 65°C. From Ta = 65 to 85°C a derating factor of −10 mW/°C shall be applied until 300 mW.
