POWER TRANSFORMER CHASSIS MOUNT : TOROIDAL MEDICAL SERIES

## VPM48-10400

## Description:

The toroidal construction inherently reduces stray fields, increases efficiency and minimizes size compared to traditional El transformers. The addition of a Flux Band further reduces the remaining stray fields. The shield between Primary and Secondary improves safety, reduces common mode signals and minimizes leakage current. Built with a Class F ( $155^{\circ}$ ) insulation system. A $140^{\circ} \mathrm{C}$ self-resetting thermal switch is included in each primary.
