## Features:

- Up to 155 Mbps operation
- 850nm wavelength
- $\quad \mathrm{ST}^{\circledR}$ style port
- Wave solderable
- Wide temperature range

## Description:

The OPF2416 family is a low cost solution for high speed fiber optic communications designs. The internal lensing of this receiver's design allows optimal response for fiber sizes of $100 \mu \mathrm{~m}$ and below. The receiver is comprised of a high speed, low noise, photodiode coupled to a transimpedance amplifier (TIA). The photodiode/TIA combination produces an output voltage that is proportional to the input light amplitude. This hybrid approach solves many of the problems of high speed data link designs by placing the photodiode close to the TIA. The amplification of the TIA makes the output much less susceptible to EMI. The output of the OPF2416 is an analog, low impedance, emitter follower voltage source. Subsequent circuitry can be utilized to convert the analog voltage to ECL/TTL for digital data rates up to 155 Mbps . The OPF2416 is available with either standard or threaded panel mount $S T^{\circledR}$ receptacles. The threaded version is also available in conductive plastic.

## Applications:

- Industrial Ethernet equipment
- Copper-to-fiber media conversion
- Intra-system fiber optic links
- Video surveillance systems

" T " suffix $=$ Threaded $\mathrm{ST}^{\circledR}$ package
"TC" suffix = Threaded, conductive $\mathrm{ST}^{\circledR}$ package

RoHS

ESD Class 2 ST $^{\circledR}$ is a registered trademark of AT\&T.

| PIN | FUNCTION |
| :---: | :---: |
| 1 | Not Connected |
| 2 | V $_{\text {OUT }}$ |
| 3 | $\mathrm{~V}_{\mathrm{EE}}$ |
| 4 | Not Connected |
| 5 | Not Connected |
| 6 | $\mathrm{~V}_{\mathrm{CC}}$ |
| 7 | $\mathrm{~V}_{\mathrm{EE}}$ |
| 8 | Not Connected |

Pins 3 \& 7 are electrically connected to the header. Pins $1,4,5 \& 8$ are mechanically connected together.

Notes:

1. Maximum of 5 seconds with soldering iron. Duration can be extended to 10 seconds when flow soldering. RMA flux is recommended.

Application Circuit

Note that the $10 \Omega$ resistor and bypass capacitor are critical.
