## Wirewound Power

Radial Terminal Resistor

## WPRT Series

- 10 to 50 watts
- Quick connect or soldered tag terminals
- Optional mounting bracket
- High overload capability

- AEC-Q200 qualified
- Flameproof case
- RoHS compliant

## Electrical Data

|  | WPRT10 | WPRT15 | WPRT20 | WPRT30 | WPRT40 | WPRT50 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Power rating at $25^{\circ} \mathrm{C}$ watts | 10 | 15 | 20 | 30 | 40 | 50 |
| Power rating at $70^{\circ} \mathrm{C}$ watts | 10 | 12.3 | 16.4 | 24.6 | 32.8 | 41 |
| 5 s overload rating at $25^{\circ} \mathrm{C}$ watts | 50 | 75 | 100 | 150 | 200 | 250 |
| Resistance range ohms | 1R0-820R | 1RO-1K0 | 2RO-1K2 | 3R0-1K5 | 6RO-1K5 | 6RO-1K5 |
| Thermal impedance $\quad{ }^{\circ} \mathrm{C} /$ watt | 18 | 14 | 12 | 8.5 | 7 | 7 |
| Isolation voltage |  |  |  |  |  |  |
|  | <20R: $\pm 400, \geq 20 \mathrm{R}: \pm 350$ |  |  |  |  |  |
| Resistance Tolerance | $\pm 5$ |  |  |  |  |  |
| Standard Values | E24 |  |  |  |  |  |
| Ambient temperature range ${ }^{\circ} \mathrm{C}$ | -55 to +155 |  |  |  |  |  |

Note: No LEV applies. Maximum voltage (dc or rms) is $V(P \times R)$

## WPRT Series

## Construction

A high purity ceramic rod, with force fit end caps onto which is wound a wire element. The element is fitted into a ceramic case with fireproof insulation cement. The terminal material is tin plated steel.

Termination Strength: The terminations meet the requirements of IEC 86.2.21
Marking: Power rating, resistance value and tolerance are legend marked.
Flammability: The resistor will not burn under any condition of applied temperature or overload.
Solvent resistance: The body protection and marking are resistant to all normal industrial solvents suitable for printed circuits.

## Performance Data

## WPRT Series

## Pulse Performance

The pulse energy capacity limits in the graph below relate to pulses below 100 ms duration based on an instantaneous wire temperature rise of $750^{\circ} \mathrm{C}$.

## Application Notes

S, SR and SB configurations have terminals which can be soldered. However, for full power operation, due to the possibility of high terminal temperatures, it is recommended that the connections be secured mechanically, rather than relying on the solder joint alone.
AT and AD configurations are designed for use in molded housing assemblies, where the alignment of terminals and the body dimensions must be defined to a greater tolerance.

SR and AR configurations have a bracket with two fixing points rather than one, and are ideal for high shock \& vibration applications.

## Ordering Procedure

Example: WPRT50AB-1K2JB168 (WPRT50, quick connect "amp" tag with bracket, 1.2 kilohms $\pm 5 \%$, Pb-free)
