EVK-NINA-W13 Evaluation Kit for NINA-W13 modules User Guide

Abstract

This document describes how to set up the EVK-NINA-W13x evaluation kits to evaluate NINA-W13 series stand-alone Wi-Fi modules. It also describes the different options for debugging and the development capabilities included in the evaluation board.

1 Product description

1.1 Overview

The EVK-NINA-W13 evaluation kit includes an evaluation board, which can be used as a reference design for the NINA-W13 series Wi-Fi modules, a quick start guide and a USB cable. For the NINA-W131 module, the evaluation board is prepared with a U.FL coaxial connector for connecting the external antenna. The NINA-W132 module has an onboard antenna; thus the EVK-NINA-W132 evaluation board does not have a U.FL connector. The main features of the EVK-NINA-W13 are:

• Available in two variants - NINA-W131 and NINA-W132

- All of the NINA-W13 module pins are available at connectors or jumpers
- Can be powered through USB (J8) or external power supply (J23)
- Equipped with a Quad High Speed USB to Multipurpose UART/MPSSE IC (FT4232) that allows serial communication and flashing over USB.

The EVK-NINA-W13 evaluation kits are available in the following two variants, depending on which NINA-W13 module is mounted on the EVK:

- EVK-NINA-W131 Evaluation kit for NINA-W131 module, RF port available on U.FL connector (J21)
- EVK-NINA-W132 Evaluation kit for NINA-W132 module with onboard antenna

This section describes the main connectors and settings that are required to get started. Figure 1 and Figure 2 show the two variants of the EVK-NINA-W13 evaluation board - EVK-NINA-W131 and EVK-NINA-W132.

Figure 1: EVK-NINA-W131 evaluation board

Figure 2: EVK-NINA-W132 evaluation board

Take care while handling the EVK-NINA-W132. Applying force to the NINA-W132 module might damage the internal antenna.

1.2 Kit includes

1.2.1 EVK-NINA-W131

The EVK-NINA-W131 evaluation kit includes the following:

- EVK-NINA-W131 evaluation board
- 2.4 GHz foldable antenna (Ex-It 2400) with reverse polarity SMA connector
- RP-SMA U.FL cable assembly, 100 mm length
- USB cable
- Quick Start guide

1.2.2 EVK-NINA-W132

The EVK-NINA-W132 evaluation kit includes the following:

- EVK-NINA-W132 evaluation board
- USB cable
- Quick Start guide

1.3 Jumper description

Parameter	Description	Name	Default
Enable SW1	Jumper at J5-1_J5-2 connects switch 1 to module pin-7	J5	\square
Enable SW2	Jumper at J6-1_J6-2 connects switch 2 to IO-27 (Jumper at J14-15_J14-16 must be populated to connect IO27 to module pin-18)	J6	Ø
	Jumper at J7-1_J7-2 connects RED LED to IO-23 (Jumper at J15-3_J14-5 must be populated to connect IO23 to module pin-1)	J7-1_2	Ø
Enable RGB-LED	Jumper at J7-3_J7-4 connects BLUE LED to IO-21 (Jumper at J16-1_J16-2 must be populated to connect IO21to module pin-8)	J7-3_4	Ø
	Jumper at J7-5_J7-6 connects GREEN LED to IO-33	J7-5_6	${\bf \overline{\Delta}}$
IO/Interface select	Module pin to IO/Interface distribution	J14	See Table 3
IO/Interface select	Module pin to IO/Interface distribution	J15	See Table 3
IO/Interface select	Module pin to IO/Interface distribution	J16	See Table 3

Figure 4: Jumper configuration to enable UART, IOs, and switches 1 and 2

1.3.2 RGB-LED Jumper configuration

Figure 5: RGB-LED to IO signals jumpers

1.4 LEDs

Function	Description	Name	Color
Power LED	Supplied from the EVK 3.3 V DC/DC converter	DS8	Green
UART TxD	Flashing LED indicates UART Tx activity (output from NINA-W1)	DS2	Green
UART RxD	Flashing LED indicates UART Rx acitivty (input to NINA-W1)	DS3	Amber
UART RTS	LED indicates UART RTS status (output from NINA-W1)	DS4 [1]	Green
UART CTS	LED indicates UART CTS status (input to NINA-W1)	DS5 [1]	Amber
UART DTR	LED indicates UART DTR status (output from NINA-W1)	DS6 [1]	Green
UART DSR	LED indicates UART DSR status (input to NINA-W1)	DS7 [1]	Amber
status	RGB LED to present module satus	DS9 [1]	RGB

Table 5: EVK-NINA-W13 LEDs description

[1] To control the LEDs, the corresponding signal jumper(s) must be populated.

Figure 6: Position of LEDs on EVK-NINA-W132 and EVK-NINA-W131

1.5 Connectors

The available connectors on the EVK-NINA-W13 evaluation board are shown in Figure 7.

Figure 7: EVK-NINA-W13 connectors

Connector	Description
J1, J2, J3, J4	Connectors for accessing the NINA-W1 IO signals (GPIO)
J8	USB connector; type Micro-B
J10	Reserved
J21	RF-port at U.FL coaxial connector for external antenna (connector J21 is not populated on EVK-NINA-W132)
J22	RJ45 connector, reserved for future use (RMII to PHY)
J23	2.1 mm Power jack, positive center pin, 5 – 12 V

Table 6: EVK-NINA-W13 connector descriptions

1.6 Buttons

The EVK-NINA-W13 evaluation board has four buttons as explained in Table 7. Two of them can be connected to NINA-W1 pins via jumper configuration.

Description
Reset button, triggers the reset logic that pulls module pin-19 low
If reset is asserted pressing BOOT-switch will pull module pin-27 low
General function button connected to jumper J5 pin-2
General function button connected to jumper J6 pin-2

Table 7: EVK-NINA-W13 buttons descriptions

UBX-17011007 - R04

1.7 Configuration options

Table 8: Module pin to IO signal conversion

(1) Connector/jumper placed inside the brackets indicates that a jumper must be positioned at the corresponding position of the IO distribution jumpers J14 – J17 if the IO-signal is to be presented at the designated connector/jumper as mentioned in Table 3.

(2) These IO signals require a second jumper to be positioned at the IO distribution jumper J18 as mentioned in Table 4.

1.7.1 Power supply

The supply voltage to the EVK-NINA-W13 evaluation board can be sourced from the following connectors:

- USB (J8)
- Depending on your USB source, the USB supply current may be insufficient.
 - External power supply (J23): The external supply voltage must be in the range 5 12 V

2 Setting up the evaluation board

2.1 Evaluation board setup

The EVK-NINA-W1 is delivered with the u-blox connectivity software installed on the module.

Before connecting the module, download and install the latest u-blox s-center evaluation software from the u-blox website.

Plug in external supply power at connector J23 or connect J8 (USB type Micro B) to a USB host using the USB cable. The status light (DS8) will turn green, indicating that the internal EVK 3.3 V is on.

- When using the EVK-NINA-W131, before powering up the EVK, ensure that you have connected the 2.4 GHz antenna with the U.FL antenna connector (J21). Failing to do so may cause undesired operation. The EVK-NINA-W132 has an onboard antenna.
- Be careful to check polarity before connecting external power supply to the EVK-NINA-W13 evaluation board. Center conductor is positive (+) and the ring is negative (-).

The current consumption during startup of the EVK can be high.

The operating system will install the correct COM port drivers automatically. The drivers will need to be installed only when you connect the unit to a new computer for the first time. For more information about the COM ports and their configuration, see the *FTDI FT4232H Datasheet [3]*.

One COM port will automatically be assigned to the unit by the Windows OS. To view the assigned COM ports on Windows 7, follow the steps mentioned below:

- Open the **Control Panel** and click **Hardware and Sound**.
- Click **Device Manager** in **Devices and Printers**. This will open the Device Manager window where you can view the assigned COM ports.

2.2 Starting up

Perform the following steps to enable communication with the module:

- 1. Start the u-blox s-center evaluation software.
- 2. Use the default baud rate 115200, 8N1 with flow control.
- 3. You will now be able to communicate with the module through AT commands.

For a list of available AT commands, see the *u-blox Short Range AT Commands Manual* [2].

2.3 Getting the latest software

Send an email to the support team email address for your area as listed in the Contact section for information about the latest available software.

Revision history

Revision	Date	Name	Comments
R01	22-May-2017	ovik, kgom	Initial release.
R02	04-Jul-2017	ovik, mwej	Updated Figure 7 and Table 8 due to pin swap on connectors J2 and J3. Updated Figure 8 and schematic drawing (Appendix B). Updated assigned COM ports in section 2.1.
R03	09-Nov-2017	kgom	Renamed this document as EVK-NINA-W13 User Guide and updated the content due to the availability of a separate user guide for the EVK-NINA-W10x evaluation kits (UBX-17057549).
R04	12-Mar-2018	cmag	Updated the software version to 1.0.0 in the last table on page 2 and the "Related documents and links" section
