

Industrial LED Lighting Specialists
Professional Lighting Guide

Established in
1981 as a lighting
supplier, Unilite
has grown into
one of the world's
leading flashlight
manufacturers
in the global
illumination
market.

With over 30 years trading, Unilite has a wealth of experience dealing with a wide and diverse spectrum of businesses.

An in-house laboratory was set-up for rigorous performance and reliability tests under controlled environments.

Among others, six ANSI FL1 tests are undertaken to establish unbiased ratings to facilitate product comparison of all our products in our range. This enables customers to see the vast superiority over inferior competitor options.

The sophistication of our products requires nothing less than the finest manufacturing technology. So we are now equipped with a cutting-edge processing line of 173 computer numerical control (CNC) and 44 CNC Tapping Centre machines.

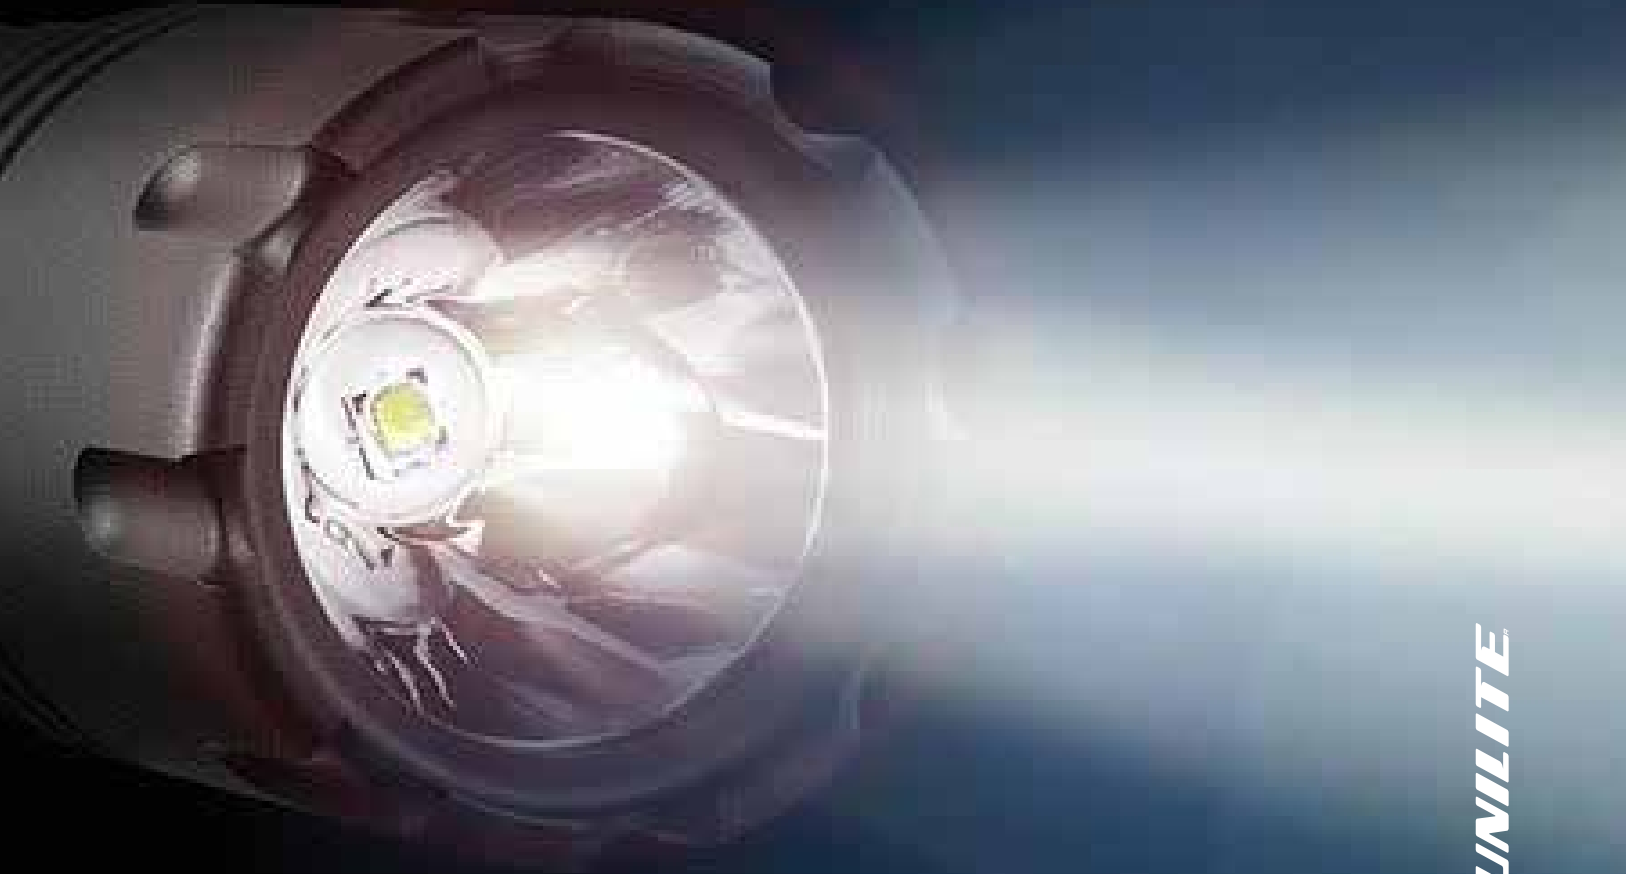

This streamlines the manufacturing process with digital precision. Our plant has also added new clean room facilities, which create a dust-free environment necessary for the production of flawless lenses and reflectors.

This large investment in R&D, machinery and production facilities has allowed Unilite to innovate new breakthroughs.

This includes Focus Control technology, Infrared motion sensor activation, Electronic Dimming Configuration and Thermal cooling systems.

Did we mention other products that Unilite make? No. Because we simply don't. We devote each and every resource to our sole and single product genre – illumination devices. That is why Unilite is the proven popular choice for the true industry professional. Make one choice, make it Unilite.

Advancements in LED technology has helped Unilite to raise the bar as we endeavour for greater power and portability.

 UNILITE

PROSAFE

STRENGTH AND ENDURANCE

Designed to deliver critical lighting for industrial work, these flashlights are made of incredibly tough specially strengthened nylon-glass polymer. Using the highest quality LED chip's these new industrial flashlights produce an amazing bright white light. The flawless reflector and AR coated toughened glass lens produce intense, piercing illumination from the heat-conductive die cast aluminium head. The rubberised handle ensures a secured grip in wet and gloved operations. With excellent resistance against shock, impact, heat and corrosion, and IP67 dust and water protection, these flashlights are built to deliver superior reliability in the most hostile and temperamental working conditions.

HIVIS[®]

EXTREME POWER

Advancements in LED technology has helped Unilite to raise the bar as we endeavour for greater power and portability. The Unilite HIVIS range is suitably tailored to meet industrial demands and requirements, such as Rail Maintenance and Search & Rescue. These industries demand products meet the highest specification and reliability. Their well-being depends on it. For the ultimate in reliability, portability and technology, the HIVIS range delivers these to the highest standard.
