Overview

Virtium's TuffDrive® eUSB 10-pin modules and keys provide high reliability and targeted storage for server, networking, embedded, and industrial applications. They feature the widely supported USB 2.0 and 3.0 interfaces, ensuring compatibility with countless systems.

Virtium backs its world-class storage products with a five-year warranty and delivers the longest product life cycles in the industry.

Applications

TuffDrive eUSBs are ideal solutions for operating system and file storage and system level diagnostics in applications that utilize chipsets that may not have a SATA interface.

Even if a host system has integrated SATA, many engineers find that eUSB modules are beneficial for storing configuration information and for providing a backup repository for data in DRAM in the event of a system-level power down.
