## MARKING

Vishay logo, SAP code of ohmic value, tolerance in \%, variation law, manufacturing date (four digits), " 3 " for the lead 3, product series $(148,149)$

## LOCATING PEGS (anti-rotation lug)

The locating peg is provided by a plate mounted on the bushing and positioned by the module sides. Four set positions are available, clock face orientation: 12, 3, 6, 9.

All 148, 149 bushings have a double flat. When panel mounting holes have been punched accordingly, an anti-rotation lug is not necessary.

## RSID OPTION: ROTARY SWITCH MODULES

- Rotary switches
- Current up to 2 A
- SPDT: Single pole, changeover switch in CCW position - 3 pins
- Sealing IP60

## MODULES: RS ON/OFF SWITCH <br> RSI CHANGEOVER SWITCH

The position of each module is free.
RS and RSI rotary switches are housed in a standard 148, 149
module size $12.7 \mathrm{~mm} \times 12.7 \mathrm{~mm} \times 5.08 \mathrm{~mm}\left(0.5^{\prime \prime} \times 0.5^{\prime \prime} \times 0.2^{\prime \prime}\right)$. They have the same terminal styles as the assembled electrical modules.

An assembly can comprise 1 or more switch modules.
Switch actuation is described as seen from the shaft end.
D: means actuation in maximum CCW position
The switch actuation travel is $25^{\circ}$ with a total mechanical travel of $300^{\circ} \pm 5^{\circ}$ and electrical travel of electrical modules is $238^{\circ}$ $\pm 10^{\circ}$.

## RSID Single Pole CHANGEOVER

In full CCW position, the contact is made between 3 and 2 and open between 3 and 1 . Switch actuation (CW direction) reverses these positions.
