# Power Down Fault Protected, 1.8 V to $5.5 \mathrm{~V}, 2.5 \Omega$, 4-Channel (4:1) Multiplexer 

## DESCRIPTION

The DG2034E is a four-channel multiplexer that operates with a single 1.8 V to 5.5 V power supply. It features power down fault protection that prevents excessive current flow when $\mathrm{V}+$ is to ground.
The device's low power dissipation and wide voltage range make it ideal for use in battery powered products. The ultra low capacitance and charge injection of the switch make it an ideal solution for data acquisition and sample and hold applications, where low glitch and fast settling are required. Low switch resistance and fast switching speeds, together with high signal bandwidth, make the DG2034E suitable for video signal switching.
The DG2034E switches one of four inputs to a common output as determined by the 3-bit binary address lines: A0, A1, and EN. Each switch conducts equally well in both directions when on, blocks input voltages up to the supply level when off, and exhibits break before make switching action.
The device's high ESD and latch-up current capability make it more reliable in designs where the part sits close to the interface.
The DG2034E is available in MSOP10 and QFN12 $3 \mathrm{~mm} \times 3 \mathrm{~mm}$ packages.

## FEATURES

- $2.5 \Omega$ switch on-resistance
- 7 pF source-off capacitance
- 27 pF comm-off capacitance
- 33 pF comm-on capacitance
- 13 ns turn-on time
- -2 pC charge injection
-     - 67 dB off-isolation at 1 MHz
- -71 dB crosstalk at 1 MHz
- 166 MHz bandwidth
- 8 kV ESD / HBM
- 400 mA latch-up current

## BENEFITS

- Power down fault protection
- Low parasitic and charge injection
- Wide operation voltage range
- High ESD tolerance

## APPLICATIONS

- Automatic test equipment
- Process control and automation
- Data acquisition systems
- Meters and instruments
- Medical and healthcare systems
- Communication systems
- Audio and video switching
- Relay replacements

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package / tape drawings, part marking, and reliability data, see www.vishay.com/ppg? 73172.

## MSOP: 10-LEADS

JEDEC Part Number: MO-187, (Variation AA and BA)

NOTES:

1. Die thickness allowable is $0.203 \pm 0.0127$.
2. Dimensioning and tolerances per ANSI.Y14.5M-1994.
3. 

Dimensions " $D$ " and " $E_{1}$ " do not include mold flash or protrusions, and are measured at Datum plane $-\mathrm{H}^{-}$, mold flash or protrusions shall not exceed 0.15 mm per side.
4.
5.
6.

Dimension is the length of terminal for soldering to a substrate
Terminal positions are shown for reference only.
Formed leads shall be planar with respect to one another within 0.10 mm at seating plane.

The lead width dimension does not include Dambar protrusion. Allowable Dambar protrusion shall be 0.08 mm total in excess of the lead width dimension at maximum material condition. Dambar cannot be located on the lower radius or the lead foot. Minimum space between protrusions and an adjacent lead to be 0.14 mm . See detail "B" and Section "C-C".
8. Section "C-C" to be determined at 0.10 mm to 0.25 mm from the lead tip.
9. Controlling dimension: millimeters
10. This part is compliant with JEDEC registration MO-187, variation AA and BA.
11. Datums -A- and -B- to be determined Datum plane -H-

Exposed pad area in bottom side is the same as teh leadframe pad size.

NOTES:

1. All dimensions are in millimeters.
2. $N$ is the total number of terminals.
3. Dimension $b$ applies to metallized terminal and is measured between 0.25 and 0.30 mm from terminal tip.

Coplanarity applies to the exposed heat sink slug as well as the terminal.
5. The pin \#1 identifier may be either a mold or marked feature, it must be located within the zone iindicated.

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
