

# Interference Suppression Film Capacitor - Class X1 Radial MKP 330 $V_{AC}$ - Standard Across the Line

#### **FEATURES**

- 7.5 mm to 27.5 mm lead pitch
- Small dimensions
- · High voltage capability
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

ROHS COMPLIANT HALOGEN

> <u>GREEN</u> (5-2008)

#### **APPLICATIONS**

For standard across the line X1 applications
See also application note: <a href="https://www.vishay.com/doc?28153">www.vishay.com/doc?28153</a>

| QUICK REFERENCE DATA                            |  |
|---|--|
| Capacitance range (E12 series)                  | 0.001 μF to 2.2 μF (preferred values according to E6)  |
| Capacitance tolerance                           | ± 20 %; ± 10 %; (± 5 % on request)   |
| Climatic testing class according to IEC 60068-1 | 55/110/56/B  |
| Rated AC voltage                                | 330 V <sub>AC</sub> ; 50 Hz to 60 Hz   |
| Permissible DC voltage                          | 800 V <sub>DC</sub> at 85 °C   |
| Maximum application temperature                 | 110 °C   |
| Reference standards                             | IEC 60384-14 ed-4 and EN 60384-14<br>IEC 60065 requires pass. flamm. class B<br>CSA-E384-14; UL 60384-14<br>CQC GB/T6346.14-2015   |
| Dielectric                                      | Polypropylene film   |
| Electrodes                                      | Metallized   |
| Construction                                    | Mono construction  |
| Encapsulation                                   | Plastic case, epoxy resin sealed, flame retardant<br>UL-class 94 V-0   |
| Leads   | Tinned wire  |
| Marking   | C-value; tolerance; rated voltage; sub-class; manufacturer's type; code for dielectric material; manufacturer location, year and week; manufacturer's logo or name; safety approvals |

#### Note

• For more detailed data and test requirements, contact rfi@vishay.com

#### Note

• Ø  $d_t \pm 10$  % of standard diameter specified

#### **COMPOSITION OF CATALOG NUMBER**

#### Notes

- For detailed tape specifications refer to packaging information www.vishay.com/doc?28139
- (1) Packaging will be bulk for all capacitors with pitch ≤ 15 mm and such with long leads (> 5 mm). Capacitors with short leads up to 5 mm and pitch > 15 mm will be in tray and asking code will be "T".

| SPECIFIC REFERENCE DATA  |                         |                         |  |

The ENEC-approval together with the CB-certificate replace all national marks of the following countries (they have already signed the ENEC-agreement): Austria; Belgium; Czech. Republic; Denmark; Finland; France; Germany; Greece; Hungary; Ireland; Italy; Luxembourg; Netherlands; Norway; Portugal; Slovenian; Spain; Sweden, Switzerland and United Kingdom.

#### **MOUNTING**

#### **Normal Use**

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoliers are designed for mounting on printed-circuit boards by means of automatic insertion machines.

For detailed tape specifications refer to packaging information www.vishay.com/docs?28139

#### Specific Method of Mounting to Withstand Vibration and Shock

In order to withstand vibration and shock tests, it must be ensured that the stand-off pips are in good contact with the printed-circuit board:

- For original pitch ≤ 15 mm the capacitors shall be mechanically fixed by the leads
- For larger pitches the capacitors shall be mounted in the same way and the body clamped

#### **Space Requirements on Printed-Circuit Board**

The maximum space for length ( $l_{max}$ ), width ( $w_{max}$ ) and height ( $h_{max}$ ) of film capacitors to take in account on the printed circuit board is shown in the drawings.

- For products with pitch  $\leq$  15 mm,  $\Delta w = \Delta l = 0.3$  mm and  $\Delta h = 0.1$  mm
- For products with 15 mm < pitch  $\leq$  27.5 mm,  $\Delta w = \Delta l = 0.5$  mm and  $\Delta h = 0.1$  mm

Eccentricity defined as in drawing. The maximum eccentricity is smaller than or equal to the lead diameter of the product concerned.

#### **SOLDERING CONDITIONS**

For general soldering conditions and wave soldering profile we refer to the document "Soldering Guidelines for Film Capacitors": <a href="https://www.vishav.com/doc?28171">www.vishav.com/doc?28171</a>

#### STORAGE TEMPERATURE

 $T_{stg}$  = -25 °C to +35 °C with RH maximum 75 % without condensation

#### **RATINGS AND CHARACTERISTICS REFERENCE CONDITIONS**

Unless otherwise specified, all electrical values apply to an ambient free temperature of 23 °C  $\pm$  1 °C, an atmospheric pressure of 86 kPa to 106 kPa and a relative humidity of 50 %  $\pm$  2 %.

For reference testing, a conditioning period shall be applied over 96 h  $\pm$  4 h by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20 %.

#### **CHARACTERISTICS**

Capacitance as a function of ambient temperature (typical curve)

1000

Impedance as a function of frequency (typical curve)

Resonant frequency as a function of capacitance (typical curve)

Max. RMS voltage as a function of frequency

Max. RMS current as a function of frequency

Insulation resistance as a function of ambient temperature (typical curve)

#### **APPLICATION NOTES**

- For X1 electromagnetic interference suppression in standard across the line applications (50 Hz/60 Hz) with a maximum mains voltage of 330 V<sub>AC</sub>
- For series impedance applications we refer to the application note: <a href="https://www.vishay.com/doc?28153">www.vishay.com/doc?28153</a>
- For capacitors connected in parallel, normally the proof voltage and possibly the rated voltage must be reduced. For information depending of the capacitance value and the number of parallel connections contact: <a href="mailto:rfi@vishay.com">rfi@vishay.com</a>
- These capacitors are not intended for continuous pulse applications. For these situations, capacitors of the AC and pulse programs must be used
- The maximum ambient temperature must not exceed 110 °C
- Rated voltage pulse slope:
   if the pulse voltage is lower than the rated voltage, the values of the specific reference data can be multiplied by 465 V<sub>DC</sub> and divided by the applied voltage

#### **INSPECTION REQUIREMENTS**

#### **General Notes**

Sub-clause numbers of tests and performance requirements refer to the "Sectional Specification, Publication IEC 60384-14 ed-3 and Specific Reference Data".

### **Disclaimer**

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
