## Optocoupler, Photodarlington Output, AC Input, High Gain (Single, Dual Channel)

## LINKS TO ADDITIONAL RESOURCES

## DESCRIPTION

The IL755, ILD755 are bidirectional input optically coupled isolators. They consist of two gallium arsenide infrared emitting diodes coupled to a silicon NPN photodarlington per channel.
The IL755 is single channel Darlington optocoupler. The

ILD755 has two isolated channels in a single DIP package.
FEATURES

- AC or polarity insensitive inputs
- Built-in reverse polarity input protection

- Industry standard DIP package
- Material categorization: for definitions of compliance please see

RoHS COMPLIANT

## APPLICATIONS

- Designed for applications requiring detection or monitoring of AC signals

## AGENCY APPROVALS

- UL / cUL 1577
- DIN EN 60747-5-5 (VDE 0884-5) for:
- IL755
- ILD755
- CSA
- CQC GB8898 / CQC GB4943.1
- BSI

## Note

- Additional options may be possible, please contact sales office

## Note

- Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of this document. Exposure to absolute maximum ratings for extended periods of the time can adversely affect reliability

## Note

- As per IEC 60747-5-5, § 7.4 .3 .8 .2 , this optocoupler is suitable for "safe electrical insulation" only within the safety ratings. Compliance with the safety ratings shall be ensured by means of protective circuits
