

217 SERIES Surface Mount Heat Sinks

D²PAK, TO-220, SOT-223, SOL-20

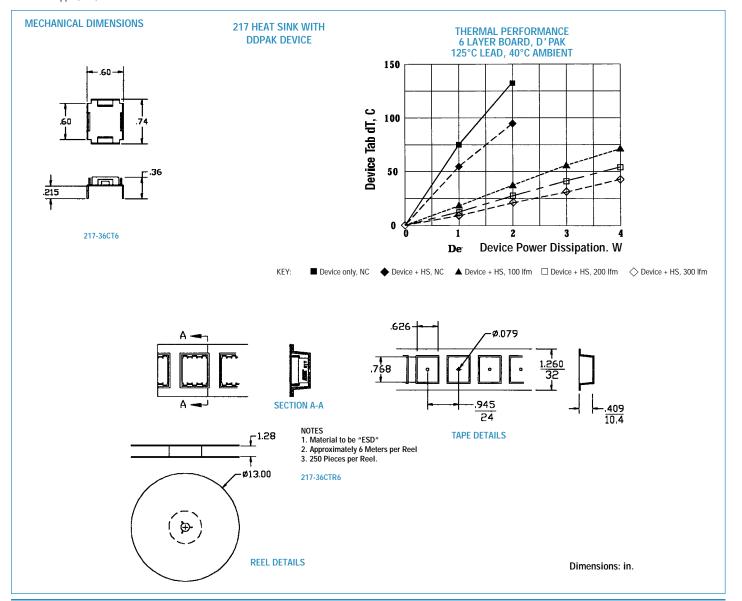

Compatible with surface mount technology (SMT) automated production techniques for ease of assembly and a variety of soldering methods, these heat sinks allow greater packaging densities and reduction in PC-board area, increasing the power dissipation of surface mount devices (SMDs) while maintaining and improving manufacturers' component thermal specifications.

FEATURES AND BENEFITS:

- No interface material is needed
- Copper with tin-lead plating for improved solderability and assembly
 Both the component and the heat sink are installed on the PC-board utilizing
 standard SMT assembly equipment for "Tape & Reel" and "Tube" formats
 EIA standards and ESD protection are specified
 Can be used with water soluble or no clean SMT solder creams or other pastes

Mounting tabs are pre-tinned to ensure excellent wave-solder bond and good electrical connections for vertical mounting of TO-220 and TO-202 semiconductor packages. These heat sinks are designed for use where minimum PC

board space is available. The 288-1AB is a stamped aluminum heat sink, black anodized, designed for applications requiring good heat dissipation from a heat sink occupying minimum space, available at minimum cost.

271 SERIES Top-Mount Booster Heat Sinks for Use with 270/272/280 Series

Material: Aluminum, Black Anodized

These exceptionally low-cost heat sinks can be mounted horizontally under a TO-220 or TO-202 case style with a maximum height of only 0.375 in. (9.4). For added performance, a 271 Series heat sink can also be used for double-sided heat dissi-

pation. The 270-AB and 280-AB accept one power semiconductor; the 272-AB is designed for two power semiconductors. Specify solderable tab options for the 272 Series by the addition of suffix "01" or "02" to the standard part number (i.e. 272-AB01 or 272-AB02).

289 AND 290 SERIES Low-Cost Single or Dual Package Heat Sinks

Material: Aluminum, Black Anodized

Low in cost and compact in overall dimensions, one 289 Series heat sink can accommodate one semiconductor; the 289 Series is available with a black anodized finish (289-AB) or with

no finish (289-AP). Two semiconductors can be mounted to the 290-2AB style.

Material: Aluminum, Black Anodized

Designed for mounting horizontally or vertically on a circuit board, 291 Series heat sinks employ a unique clip for attachment of TO-220 case styles.

One type is available with a locking clip and one with a 0.140 in. (3.6) diameter mounting hole only.

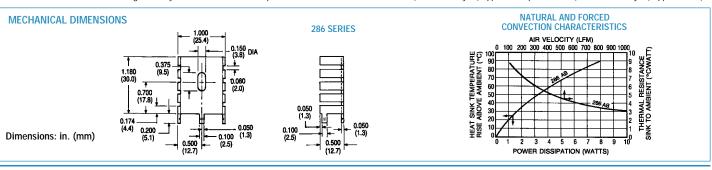

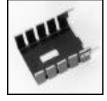

286 SERIES Aluminum and Copper Low-Cost Wave-Solderable Heat Sinks

TO-220

| | Height Above | | Thermal Performance at Typical Load | | | | |

Efficient heat removal at low cost can be achieved by inserting the 286 Series directly into predrilled circuit boards; scored mounting tabs may be bent after insertion to provide added stability. The 286 Series can be wavesoldered directly to the board. Material: 286-AB style (aluminum, black anodized), 286-CBT style (copper, black paint tin tabs), and 286-CT style (copper, tinned).

287 SERIES Wave-Solderable Low-Cost Heat Sinks

Material: Aluminum, Black Anodized

Mount these cost-effective TO-220 heat sinks vertically into pre-drilled printed circuit boards. Soldered, pre-tinned tabs can be wavesoldered directly to the board. A 0.375 in. $(9.5\ \text{mm})$

mounting slot allows for correct positioning of TO-220 and similar semiconductor packages.

Mount and effectively heat sink small stud-mounted diodes with the 695 Series space-saving heat sink type. Each unit is black anodized aluminum with an 0.200 in. (5.1) dia. mounting hole centered in the base. The folded fin design

provides good heat dissipation for use where height is limited above the printed circuit board or base plate.

Materials and Finish: Cups - beryllium copper, black ebonol "C"; Bases - brass, black ebonol "C"; Ceramic Spacers - beryllium oxide

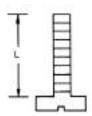

Base Mounting Configurations = T0-5

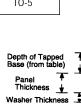

Plain Type — Epoxy bonded, or used with #4 pan head screws.

Tapped Base — #4-40 UNC screw (not supplied) fits tapped hole. Care should be taken not to use too long a screw, which could short against the semiconductor case. For correct screw lengths:

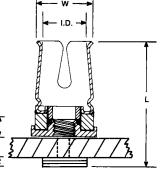

Correct Screw Length (L) = Depth of Base + Panel Thickness + Washer Thickness

Stud Mounting Base. #6-32 UNC or #10-32 UNF studs. Nuts and washers not supplied. Stud hole must be slightly countersunk to ensure flat mounting.

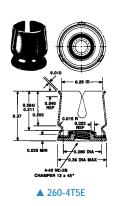

Beryllium Oxide Insulated For TO-5

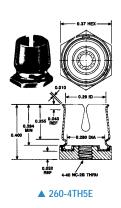

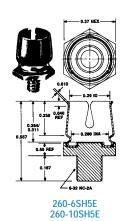

To determine the correct mounting screw lengths, add dimensions as follows:

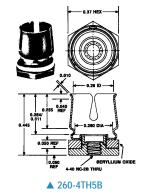

Correct Screw Length (L) = Depth of Base + Panel Thickness + Washer Thickness

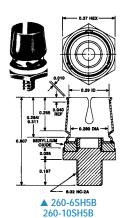

Epoxy Insulated For TO-5

- "C" Finish SB Silver-bearing copper; black
- ebonol "C" Aluminum, black
- anodized AΡ Aluminum, no finish applied

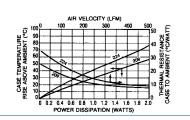

DIODES

TO-92

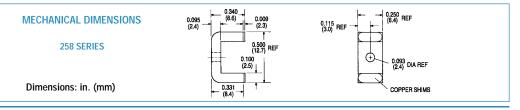

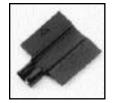

258 SERIES Thermal Links for Fused Glass Diodes

Standard **Dimensions** Weight P/N Material Finish lbs. (grams) 258 🔺 0.500 (12.7) x 0.250 (6.4) x 0.340 (8.6) Aluminum DeltaCoate™ 151 on all surfaces 0.0018 (0.82) except solder pads and base

The thermal resistance from diode leads to chassis or heat sink is 12°C/watt, when unit is mounted with TYPE 120 Joint Compound. If a 10°C/watt chassis or sink to ambient impedance is available, the thermal resistance from the diode leads to ambient is reduced from about 150°C/watt to 22°C/watt

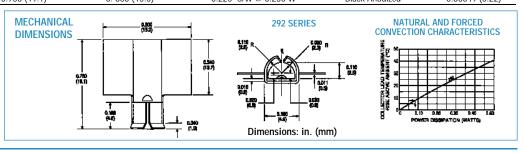

292 SERIES Heat Sink for Single TO-92

Height Above PC Board Overall Fin Width Thermal Performance Standard Weight **Natural Convection Finish** P/N in. (mm) in. (mm) lbs. (grams) 292-AB 🔺 0.750 (19.1) 0.600 (15.3) 0.225° C/W @ 0.250 W Black Anodized 0.00049 (0.22)

Power semiconductors packaged in a TO-92 style plastic case can be cooled effectively at little additional cost with the addition of the 292-AB heat sink. The 292-AB is effective over the typical power range of such devices. Material: Aluminum, Black Anodized.

634 SERIES Slim Profile Unidirectional Fin Vertical Mount Heat Sink

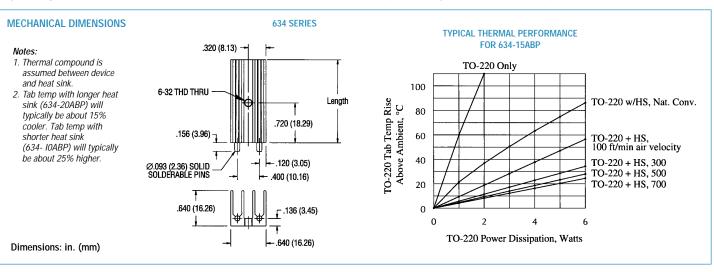

TO-220 and TO-218

Material: Aluminum, Black Anodized

These slim profile unidirectional fin heat sinks offer users two assembly alternatives for vertically mounting TO-220 and TO-218 components. Models are available with or without wave-

solderable pins on 0.40 in. (10.2) centers, making them ideal for a variety of applications where quick assembly is needed and space is at a premium.

637 SERIES High-Efficiency Heat Sinks For Vertical Board Mounting

Wave-solderable pins. Material: Aluminum, Black Anodized

Excellent performance, choice of wave-solderable plain pins (PP-Type) or wave-solderable hex-shaped standoff pins (SP-Type), and reduced assembly cost. Note: Order 330 SC or 285 SC SpeedClip™ separately.

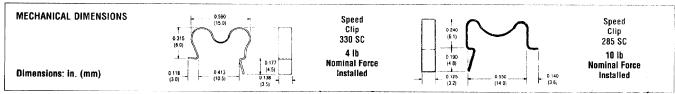

285 AND 330 SERIES 285 SC and 330 SC SpeedClips™ for 667 Series Heat Sinks

| Standard P/N | Nominal Installed Loading Force | For Use With Series | Material | Weight lbs. (grams) |
|-----------------|------------------------------------|-------------------------|-----------------|------------------------|
| 285 SC | 10 lbs | 232, 237, 240, 252, 667 | Carbon Steel | 0.00053 (0.24) |
| 330 SC | 4 lbs | 232, 237, 240, 252, 667 | Stainless Steel | 0.00074 (0.34) |

SpeedClips™ employ a locking safety tab for mounting. Must be ordered separately for these heat sink series. Use these SpeedClips™ with our 237, 240, 252, and 667 Series heat sinks

for the lowest production assembly time and cost. Order one SpeedClip™ for each 667 Series heat sink purchased.

647 SERIES High-Performance Heat Sinks for Vertical Board Mounting

Material: Aluminum, Black Anodized

These low-cost heat sinks provide the most power dissipation at the lowest unit cost and are available in three standard types to mount and cool one TO-3 or TO-66 metal power semiconductor type or two plastic package TO-220 power semiconductor types. For higher power

semiconductors, the 690 Series can dissipate up to 20 watts while maintaining a mounting surface temperature rise above ambient air temperature of no more than 91°C.

Material: Aluminum, Black Anodized

Achieve optimum natural convection cooling per unit volume occupied above the printed circuit board for TO-3 (one semiconductor package per heat sink) or for two TO-220 style cases, when this low-cost heat sink is used. Any mounting attitude will provide free circulation

of air in natural convection applications. These 680 Series heat sinks can also be specified without any semiconductor mounting hole pattern by specifying suffix "K" (Example: 680-5K).

| 603K | 2.000 (50.8) x 2.000 (50.8) | 0.562 (14.3) | None | 41°C @ 5.0W | 4.0° C/W @ 175 LFM | 0.0810 (36.74) |

Material: Aluminum Alloy, Black Anodized

Use these low-height heat sinks on printed circuit board applications for TO-66 power semiconductors and DO-4 and DO-5 diodes, where close board-to-board spacing and efficient heat dissipation are required. The 601 and 603 Series may also be attached to enclosure panels or brackets using isolation hardware where necessary.

635 SERIES Space-Saving Low-Cost Heat Sinks

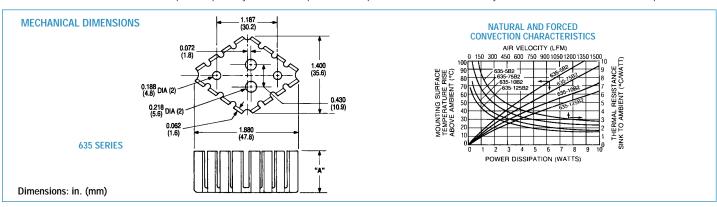

TO-3

| | Height Above | Outline | Thermal Perform | mance at Typical Load | Semiconductor | |
|-----------------|-----------------------|-----------------------------|-----------------------|-----------------------|--------------------------|------------------------|
| Standard P/N | PC Board "A" in. (mm) | Dimensions in. (mm) | Natural Convection | Forced Convection | Mounting Hole Pattern | Weight lbs. (grams) |
| 635-5B2 | 0.500 (12.7) | 1.900 (48.3) x 1.420 (36.0) | 90°C @ 8.0W | 6.0° C/W @ 300 LFM | TO-3 | 0.0200 (9.07) |
| 635-75B2 | 0.750 (19.1) | 1.900 (48.3) x 1.420 (36.0) | 77°C @ 8.0W | 4.8° C/W @ 300 LFM | TO-3 | 0.0220 (9.98) |
| 635-10B2 | 1.000 (25.4) | 1.900 (48.3) x 1.420 (36.0) | 61°C @ 8.0W | 3.6° C/W @ 300 LFM | TO-3 | 0.024 (10.89) |
| 635-125B2 | 1.250 (31.8) | 1.900 (48.3) x 1.420 (36.0) | 53°C @ 8.0W | 3.1°C/W @ 300 LFM | T0-3 | 0.028 (12.70) |

Material: Aluminum Alloy, Black Anodized

Use this low-cost TO-3 heat sink style for multiple TO-3 applications on a single printed circuit board, where two or more TO-3s must be placed in proximity and minimum space is

available for heat sinking. Four different heights are available, all with TO-3 mounting hole pattern in the base. Consult factory for TO-66, TO-220, and multilead IC hole patterns.
