General description

These dual monolithic silicon surge protection diodes are designed for applications requiring transient overvoltage protection capability. They are intended for use in voltage and ESD Sensitive equipment. as computers, printers, business machines, communication systems, medical equipment and other applications. Their dual junction common anode design protects two separate lines using only one package. These devices are ideal for situations where board space is at a premium.

Features and benefits

- 2 unidirectional transil functions
- Reverse stand-off voltage: 18v Max
- Low leakage current: nA Level
- Response time is typically < 1 ns
- ESD Protection: 30kv(air)/ 30kv(contact) (IEC61000-4-2)

Application information

- computers
- printers
- COmmunication systems
- cellular Handsets and Accessories
- portable Electronis
- Industrial controls
- set-ToP Box
