Xcelite®

Precision Screwdrivers, Nutdrivers, Pliers, Cutters and Tool Kits

Xcelite®

Originating from a tiny metalworking company in 1921,
the Xcelite® brand of precision hand tools has been a

favorite of service technicians for over 75 years. It is now known throughout the electronics industry for its full line of high quality precision screwdrivers, nutdrivers, pliers, cutters, interchangeable-blade sets, specialized tools and kits.

Table of Contents

Contents	Page No.
Xcelite® tool selection guide	1 - 3
Screwdrivers, battery powered	4
Screwdrivers, for slotted screws, Phillips®, and Torx®	4 - 11
Screwdriver sets	11
Screwdrivers, Allen® hex socket type, and Ballpoint style	12 - 14
Combination reversible screwdrivers and kits	14 - 17
Nutdrivers-fixed handles—inch and Metric sizes	17 - 21
Compact convertible tool sets	21 - 24
Series 99® blades, shanks, handles and kits	25 - 33
Series 99® compact interchangeable-blade sets	34 - 38
Plier selection information	39
Cutting capability guide	40
Diagonal cutting pliers	41 - 47
Diagonal end cutting pliers	48
Diagonal chain nose pliers	49
Diagonal long needle nose pliers	49 - 53
Needle nose pliers	54 - 55
Electronics pliers handy pack assortment	56
Electronic shearcutters and pliers	57 - 59
Pliers and cutters	60 - 62
Utility Pliers	63
Special tools for special problems	63 - 66
Tweezers	67
Precision knives and blades	98 - 69
Multi-purpose tool kit	70
Xcelite® attaché tool cases	71 - 81
Tools for cable terminals and connectors	82 - 93
Xcelite® Numerical Index	94 - 96

FEATURE CODES

- E = (Prefix) “Accu-Lite” Grips
- V = Blister carded
- J = Flush cutting edges
- K = Semi-flush cutting edges
- S = Coil spring
- G = Smooth jaws

XP1 Cordless Driver

XP1 kit contains a driver, battery, battery charger, 3 bits, and 1 adapter for use with all Xcelite® Series 99® interchangeable bits

Features:

- Multi-stage clutch
- 2-speed control: Low speed of 180 RPMs; High speed of 360 RPMs
- 3.6v Nickel-Cadmium battery
- Battery charger for a quick 1 hour charge
- UL and cUL approved charger
- Motor: 3.6v DC
- Maximum clutch torque: Low 28.5 in. lbs.; High 14 in. lbs.
- Overall driver length is 10.8"

Pro Series Electronic Screwdrivers and Sets

- The handle core is made of hard shockproof plastic for durability, while the outer coating is soft rubber for comfort and slip resistance
- ESD safe hard plastic core to protect sensitive components
- The handles are ergonomically designed, allowing sustained high torque with minimal slippage and muscle fatigue
- Smooth shatterproof seamless handle cap for minimal friction between hand and handle when screwdriver is being turned
- Narrow pinch grip for comfort and control
- Thumb bolster allows added downward force
- Satin finish chrome molybdenum steel shafts provide durability
- Specially treated black oxide tips eliminate light reflection

Ballpoint Style, Allen® Hex Socket Type

- Unique “ballpoint” tip makes Xcelite® drivers ideal for tightening and removing Allen type socket head screws in out-of-reach places or merely when wanting an easier, quicker way to drive them home
- Will engage screw head from any angle
- Slips easily into sockets and holds securely without reaming, because ends are precision-machined to close tolerance

Xcelite

Electronic Assembly Tools Plier Selection Information

General

When selecting electronic cutting pliers, you should attempt to minimize your cost per cut by selecting the proper tool for each application. The type of cut, cutting area access, cutting edge quality and user preference will influence your choice.

Type of Cut

Electronic pliers are available with cutting edge angles that produce standard, semi-flush and flush cuts. These terms refer to the amount of "pinch" left on the tip of a wire after it has been cut

Standard cutting edges should be used for applications that are not sensitive to either the amount of shock transmitted through the wire to the component (during cutting) or to the amount of "pinch" left on the wire tip (after cutting).

Semi-flush edges can be employed for most applications. They reduce shock transmittal and wire tip "pinch."

Flush edges should be selected only for delicate applications, which require minimal shock transmittal and wire tip "pinch." Flush cutters produce a clean cut, which facilitates soldering and increases connection reliability. With small cutting edge angles, the life of flush cutters is substantially less than that of semi-flush cutters. The larger the cutting edge angle, the more cuts you can expect from the tool. For electronic assembly work, the semi-flush cutter is often the most cost-effective choice.

Cutting Area Access

Access to cutting areas can determine the shape and thickness of the cutting head. Tight clearances around the cutting area, the need to reach over in-place components or to work from directly above, and visibility requirements are all factors which will affect your choice of a tool. However, it is important to recognize that head shape and thickness are directly related to cutting edge life

Head Shape

Always select a cutter with the largest head that will meet your particular cutting requirements. It is a proven fact that more material behind the cutting edges gives more cuts and longer life.

Oval head cutters are the most versatile. They have the most material behind the cutting edges, and last longest. Tapered and angled head cutters should be selected only when access to the cutting area is limited. These cutters have less head mass, and provide proportionally fewer cuts.

Head Thickness

Head thickness is related to cutting life in the same way as head shape. Cutting pliers with thicker heads also last longer. Whenever possible, use pliers with standard head thickness. Relieved head designs should be chosen only to accommodate difficult access problems.

Cutting Edge Quality

The quality of a pair of cutting pliers can be determined by visual inspection. The blades should meet smoothly and evenly at the tips. From a point just behind the tips to the joint, an increasing amount of light should be visible

A precision tip interface assures clean cutting of fine wires, while the "no contact" area behind the tips extends cutter life by allowing the tips to continue to meet as they wear.

User Preference

Other considerations can be a matter of personal preference. Handle shape, grip color, grip material, spring tension and leverage ratio are usually related to user comfort.

Proper spring tension will allow pliers to open and close with minimum effort. Finally, pliers with high leverage ratios provide the greatest ease of use and the longest life.

Leverage Ratio

Leverage ratio is obtained by dividing dimension A into dimension B.

Xcelite® Electronic Pliers

Provide the ultimate in precision plier

- Manufactured to the highest professional quality
- Easily handles a wide range of electronic assembly requirements
- Smooth, easy-working, corrosion-proof joint
- Maintains perfect cutting edge and tip alignment
- All Xcelite® cutters and pliers are standard with ESD safe cushion grip handles. Exception: red grip products

Xcelite® Diagonal Cutting Pliers

FLUSH OR SEMI-FLUSH CUTTING EDGES HANDLE MOST CUTTING REQUIREMENTS

CUTTING EDGES MACHINE GROUND AND ELECTRONICALLY HARDENED FOR EXTENDED LIFE

FORGED ALLOY STEEL WITH POLISHED HEAD FOR HIGH DURABILITY

STEEL RIVIT FOR SMOOTH OPERATION AND LONG LIFE

HANDLE COIL SPRINGS FOR FAST CUTTING ACTION (Standard on all Models)

ESD SAFE CUSHION GRIPS FOR MAXIMUM COMFORT (Standard on all Models)

"ACCU-LITE" GRIPS ALSO AVAILABLE ON MANY MODELS

Pliers Features and Benefits

- Lightweight, miniature plier line. Includes versatile selection of diagonal, angular, tip and end cutters plus wiring and assembly tools.
- Choice of oval, tapered, relieved and angled head designs for general or confined area cutting.
- Full flush or semi-flush cutting edges machine ground and electronically hardened for extended life in cutting either hard or soft wires.
- Needle nose styles include long, short, curved, flat and round to handle most forming, looping, twisting, insertion and pickup jobs.
- Steel joint maintains perfect cutting edge and tip alignment to maximize operational consistency and tool life.
- Handle coil springs, allow faster cutting action with reduced user fatigue.
- Forged from high quality alloy steel for maximum strength and durability.
- Precision ground to close tolerances, individually finished and tested to ensure exact fit of jaws.
- Polished heads with gun metal handles.

Xcelite

Accu-Lite Handles Meet The Optimum Criteria For Hand Tools:

THUMB FLAIR INCREASES TOOL CONTROL

EXCLUSIVE, SOFT, NON-SLIP FOAM GRIPS PROVIDE POSITIVE GRIPPING AND MAXIMUM COMFORT

IDENTICALLY FORMED HANDLES ALLOW EITHER RIGHT OR LEFT-HAND USE

ANTI-STATIC GRIP MATERIAL DISSIPATES STATIC CHARGES

SOIL RESISTANT SURFACE EXTENDS GRIP LIFE

CONCAVE CONFIGURATION DISPERSES GRIPPING PRESSURE

EXTENDED HANDLE PERMITS USE OF ALL FINGERS

- **Lightweight construction**
- **Extended handle length** allows even application of force from all four fingers.
- **Exclusive, smooth, soft foam cushion grips** are free of abrupt edges and finger indentations.
- **Grip material is non-slip and compressible** to allow positive gripping and to absorb mechanical shock.
- **Handle contours adaptable for either right or left-hand use.**

Pliers Kit - Electronics Handy Pack Assortment

- A compact kit designed for the sophisticated electronics technician or dedicated hobbyist
- Consists of the six most popular Copaloy electronics pliers
- Durable pocket-pouch with heavy-duty snaps
- Each professional quality tool features the unique Copaloy rivet for smoother action

Kit Includes:

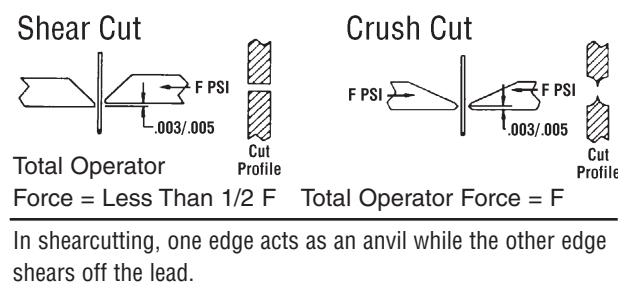

- EC54J 4 1/2" Transverse end cutting pliers
- MS54 4" Diagonal cutting pliers
- SN54 5" Long nose pliers with side cutter
- NN54 5" Fine tip needle nose pliers
- DN54G 5" Flat nose pliers
- LN54 5" Long nose pliers
- Pocket pouch with snaps

Electronic Shearcutters and Pliers

Superior Quality and Value

- Xcelite's Shearcutter flush cutting tools require less than half the operator force of most wire and lead cutting tools and transmit proportionately less shock to the component
- As a result, they comply with MIL-STD-2000, DOD-STD-2000 and WS-6536E standards
- Grips are molded of wide, shock absorbing material for operator comfort
- Models 175 and 2178 incorporate safety clips which effectively eliminate flying leads
- However, safety glasses are still recommended when using these tools

Shearcutter
170/175

Heavy-Duty
Shearcutter
1178/2178

Plier
378

Product features

- Shearcutter — Red grips (Suffix "M")
- Advanced handle design
 - Made from high quality carbon steel
 - Non-glare black finish
 - Superior shearing action

- Static-dissipative pliers — black grips (Suffix "D")
- Advanced handle design
 - Specially hardened and plated
 - Non-glare black finish
 - Superior shearing action

Xcelite

Shearcutter - General-purpose

- Low profile, general-purpose cutter
- Superior blade by-pass shear cutting action
- Better cuts with half the effort
- Greatly reduced mechanical shock delivered to the work
- 170M, 175M feature light blue grips
- 170D, 175D feature static-dissapative black grips
- 175M, 175D feature safety clips
- 170D, 175D especially hardened and plated
- Flush cuts soft wire up to 20 AWG (0.8mm)
- 170MCS packaged on a clip strip merchandising wand

Shearcutter - Heavy-duty

- Heavy-duty for IC pins, cables and harnesses
- Maximum durability
- Safety clip (on some models) prevents flying leads
- Maximum operator safety
- 1178M, 2178M feature light blue grips
- 1178D, 2178D feature static-dissapative black grips
- 2178M, 2178D feature safety clips
- 1178D, 2178D especially hardened and plated
- Flush cuts soft wire up to 14 AWG (1.6mm)

Model TCMB100STW and TCMB100MTW

The 100 Series Kits are all “The Largest and Most Elaborate”

- Contains 53 individual hand tools, 31 Series 99® interchangeable screwdriver/nutdriver blades and handles, and 2 specialized screwdriver/nutdriver kits (as listed)
- Extra large roller bearing wheels (3 5/8") with wide base for maximum stability and easy transport over rough pavement or stairs.
- Extra wide, comfortable extension handle is molded into case to prevent wear.
- Size: 18" x 15" x 8" deep.
- Extension handle locks in place automatically when extended and retracted. Easy one-handed release.
- Two tote handles for convenience. Both are spring loaded for protection.
- “D” ring provided for Bunji cords to carry other cases on top
- Case is super tough, black polyethylene rotationally molded for maximum strength. Minimum wall thickness of 0.120".
- 3-panel hinged tool pallet in lid plus additional pallet in bottom.
- Extra large storage space for additional equipment.
- Extra large all new screen mesh literature/utility pocket.

Xcelite

Tools for Cable Terminals and Connectors

Xcelite® ErgoCrimp Plus® Mechanical Crimping Tools

- ErgoCrimp Plus® are the world's most advanced crimping tools to date
- With a patented design, they deliver up to 50% better mechanical gain than any other kind
- With increased mechanical gain you will get significantly lower handle force which could result in an increase in productivity

These crimping tools have been designed to achieve maximum comfort, reliability, and durability.

Their main features are:

One-Handed Crimping

- The handle force needed for the crimping operation in most tools exceeds 60-70lbs. (27-32Kg)
- The average man and virtually all women cannot make a comfortable one-handed crimp
- Xcelite® crimping tools are designed with such a low handle force requirement that the crimp operation can be performed with only one hand

Crimping Pressure

- The configurations of the crimping nests and indentors are designed to increase the tensile strength of the crimp
- The jaw pressure applies is scientifically calculated for optimum connections

Reliability

- All components are made of high-quality Swedish steel and have been life tested for 50,000 cycles
- Precision manufacturing guarantees a uniform product of high accuracy
- After long wear, it is always possible to check the crimp dimensions with go/no-go gauges, and to adjust for eventual discrepancies by turning the patented excenter adjustment plate

Size

- Size has been minimized to allow single-handed operation and to ensure the tool fits easily into repair kits

Safety

- A ratchet device has been built in to guarantee that the user makes the exact same complete crimp every time
- Should the user start a faulty crimp, a safety release mechanism is built into the ratchet, allowing the user, with one finger, to open the tool before the cycle is complete

Economy

- Because of their considerable advantages in quality, speed, and efficiency, the payoff time for an investment in Xcelite® tools is extremely short

ErgoCrimp Plus® (ECP-000 Frame)
Length: 10.0"
Weight: 1.2lbs.

ErgoCrimp Plus® for 22-10 AWG Insulated Terminals and Splices

- ECP000 large ergonomic frame for large hands
- D100 die set for 22-10 AWG red, blue and yellow insulated terminals and splices
- Mechanical gain estimated 50%
- Guaranteed for at least 50,000 cycles
- Variety of die sets available

Cat No.	UPC No.	Packed	Description	Pack Wt.		Shelf Pack

ErgoCrimp Plus® for 22-10 Non-Insulated Terminal Splices

- Die set designed for 22-10 AWG non-insulated terminal splices
- Patented ergonomic design makes this tool easy and comfortable to use
- Lowest possible handle forces required
- High quality construction with tight tolerances
- Superior crimp die design insures the highest quality crimp results
- High strength through-hardened alloy steel and precision manufacturing
- Guaranteed for 50,000 cycles
- Precise eccentric adjustment for consistent performance for life of tool
- Tools can be purchased complete with die set or separately
- Special dies are also available upon request

Mini-Crimper/Maxi-Crimper Mechanical Crimping Tools

Xcelite® mechanical crimping tools have been designed to achieve maximum comfort, reliability, and durability. Their main features are:

One-handed Crimping

- The handle force needed for the crimping operation in most tools exceeds 60-70lbs. (27-32Kg)
- The average man and virtually all women cannot make a comfortable one-handed crimp
- Xcelite® crimping tools are designed with such a low handle force requirement that the crimp operation can be performed with only one hand

Handle Spread

- Other crimping tools on the market have open handle spreads equal to or greater than 6" at the point where the user places his grip
- This is too great a spread for the average male and female hand
- The Xcelite® mini-crimper has a handle spread of about 3 1/2"/88mm
- It is the smallest spread available in a tool this powerful
- The maxi-crimper, with about 20% more power, still has a handle spread under 4 1/2"/144mm
- Both tools fit comfortably in the average male or female hand
- With just one hand needed to hold the crimping tool, the user is now free to easily locate cable and connector in the jaw of the tool

Crimping Pressure

- The configurations of the crimping nests and indentors are designed to increase the tensile strength of the crimp
- The jaw pressure applied is scientifically calculated for optimum connections

Mini-crimper (MIC)

Length: 7.68"
Weight: 0.55lbs.
Open Handle Spread: 3.66"
Closed Handle Spread: 1.90"
Max. Crimp Force: 1,600lbs.

Maxi-crimper (MAC)

Length: 8.86"
Weight: 1.10lbs.
Open Handle Spread: 4.50"
Closed Handle Spread: 2.10"
Max. Crimp Force: 2,200lbs.

Reliability

- All components are made of high-quality Swedish steel and have been life tested for 50,000 cycles
- Precision manufacturing guarantees a uniform product of high accuracy
- After long wear, it is always possible to check the crimp dimensions with go/no-go gauges, and to adjust for eventual discrepancies by turning the patented excenter adjustment plate

Size

- Size has been **minimized** to allow single-handed operation and to ensure the tool fits easily into repair kits

Safety

- A ratchet device has been built in to guarantee that the user makes the exact same complete crimp every time
- Should the user start a faulty crimp, a safety release mechanism is built into the ratchet, allowing the user, with one finger, to open the tool before the cycle is complete

Economy

- Because of their considerable advantages in quality, speed, and efficiency, the payoff time for an investment in Xcelite® tools is extremely short.

Xcelite

Maxi-Crimper for Insulated Terminals and Splices

- Maxi-Crimper built bigger for greater terminating power
- Crimps 22-10 AWG (.75-6.0mm²) red, blue and yellow insulated terminals and splices (die nests color-coded to AWG specs)
- Incorporates ratchet to ensure a full-cycle complete crimp every time
- Crimps exceed UL® standards for most terminals from AMP, 3M, T & B and many others

32 AWG to 10 AWG Combination, Self-adjusting Wire Stripper

- Tool capable of stripping wires from 32 AWG to 10 AWG without adjustment
- Widest stripping capacity of any tool of its type
- Easily interchangeable stripping cassettes enables precision stripping
- Strips a wide range of insulation types, PVC to PTFE with just one tool. Tested to over 150,000 cycles
- The ergonomic design is lightweight, strong, and comfortable
- The tool issuitable for production of field service work
- Fine insulation can be stripped without damage to the conductor
- Low friction moving handle optimized grip span, and angled head

Cat No.	UPC No.	Packed	Description	Shelf Pack

Cable Jacket Stripper, 0.43" Maximum Diameter

CJS100

- **Precise:** Fine adjustability and repeatability assured by 9 position blade cutting depth adjustment
- **Easy to use:** Simply squeeze together, insert cable, release and rotate once, remove from cable and pull off scrap insulation
- **Safe:** Smooth, rounded, pocketable, lightweight design. No exposed blades. Replacement blades are encased in a plastic cassette
- **Flexible:** Strips the jacket from most cables up to 0.43" (11 mm) in diameter
- **Durable:** Tested to over 50,000 cycles
- **Economical:** Replaceable blade (p/n CJS100B)

Cat No.	UPC No.	Packed	Description	Shelf Pack
CJS100B	037103197122	Boxed	Replacement blade	1

Round Cable Stripper, .178" - 1.57" Diameter

• By rotating the body of the tool, the blade can be fixed in any one of three positions to provide:

Circular cuts around the cable

Lengthways along the cable

Spiral cuts along the cable

End strip circular + spiral cut

End strip circular + lengthways

Mid-span strip - two circular + spiral cut

- Unique to this type of tool, the CJS200 features two interchangeable cable retention guides giving it an incomparable stripping capacity of 0.18" to 1.57" (4.5-40 mm) in one tool. Both cable guides are included with each tool. The CJS200 can replace two or more similar products in the toolbox
- **Easy to use:** Positive locking positions for circular, lengthways, and spiral cuts
- No special tools required to interchange cable guides
- Safety strap can be attached to the eyelet at the base of the tool to prevent accidental dropping
- **Ergonomic:** The well-balanced design features rests for thumb, first, and little fingers to ease in raising of the cable retention guides
- **Durable:** Tested to over 100,000 cycles
- **Economical:** Replacement blade available (p/n CJS200B). Can be stored in the tool body

CJS200LG	037103197108	Boxed	Large cable guide for CSJ200 round cable stripper	1
CJS200SG	037103197115	Boxed	Small cable guide for CSJ200 round cable stripper	1

Coaxial Wire Stripper - Full Kits and Pre-adjusted Models

- Fastest accurate coax-stripping system
- Coaxial cable from .10" to .30" (1.87-7.6mm) in thickness (RG 178 up to RG 6) stripped in seconds
- Also removes dielectric, braid and outside insulation
- Xcelite® system available with different color-coded cassettes designed to meet exact stripping specifications
- Cassettes changed in seconds
- Available in full kits for users of many different cable sizes
- Special, pre-adjusted models or cassettes with special strip lengths made upon request

Full Kits - Coaxial Wire Stripper

3CSKWH

- Full kit designed for user who strips many different size cables (from .1" to .3"/2.5-7.6mm)
- Contains cassette indicated, all 4 Xcelite® V-Blocks, hex wrench and instruction sheets covering most possible applications
- 3-step models not recommended for cable with hollow dielectric (RG 62) or foam dielectric (use 2-step models instead)
- Cable O.D. range: .10"- .30" (2.5-7.6mm), RG 174 to Belden® 8281 or RG 6

Note: 3-STEP models are not recommended for cable with hollow dielectrics (RG 62) or foam dielectrics. Use 2-STEP models instead.
 Cable O.D. range: .10"- .30" (2.5-7.6mm) e.g. RG174 to Belden® 8281 or RG6.

Xcelite

Cassettes

- The cassette determines the strip dimension that your stripper will give
- New tool body design allows all cassettes to be used in any 2 step or 3 step full kit or pre-adjusted model
- Cassettes can be interchanged in seconds in the tool body
