

# **DATA SHEET**

# **GENERAL PURPOSE CHIP RESISTORS**

RC\_L series

±0.1%, ±0.5%, ±1%, ±5% Sizes 0075/0100/0201/0402/0603/0805/ 1206/1210/1218/2010/2512

RoHS compliant & Halogen free

#### SCOPE

This specification describes RC series chip resistors with lead free terminations made by thick film process.

# **APPLICATIONS**

• All general purpose application

# **FEATURES**

- Halogen Free Epoxy
- RoHS compliant
  - Products with lead free terminations meet RoHS requirements
  - Pb-glass contained in electrodes, resistors element and glass are exempted by RoHS
- Reducing environmentally hazardous wastes
- High component and equipment reliability
- Saving of PCB space
- None forbidden-materials used in products/production
- MSL class: MSL I

#### ORDERING INFORMATION - GLOBAL PART NUMBER

Global part numbers are identified by the series, size, tolerance, packing type, temperature coefficient, taping reel and resistance value.

#### **GLOBAL PART NUMBER**

# RC XXXX X X X XX XXXX L

(1) (2) (3) (4) (5)

6) (

(I) SIZE

0075/0100/0201/0402/0603/0805/1206/1210/1218/2010/2512

#### (2) TOLERANCE

 $B = \pm 0.1\%$ 

 $D = \pm 0.5\%$ 

 $F = \pm 1.0\%$ 

 $J = \pm 5.0\%$  (for jumper ordering, use code of J)

#### (3) PACKAGING TYPE

R = Paper taping reel

K = Embossed taping reel

S = ESD safe reel (0075/0100 only)

# (4) TEMPERATURE COEFFICIENT OF RESISTANCE

– = Based on spec.

# (5) TAPING REEL & POWER

07 = 7 inch dia. Reel & Standard power

10 = 10 inch dia. Reel

13 = 13 inch dia, Reel

7W = 7 inch dia. Reel & 2 x standard power

7N = 7 inch dia. Reel, ESD safe reel (0075/0100 only)

3W = 13 inch dia. Reel & 2 x standard power

## (6) RESISTANCE VALUE

There are 2~4 digits indicated the resistance value.

Letter R/K/M is decimal point

Example:

 $97R6 = 97.6\Omega$ 

 $9K76 = 9760\Omega$ 

 $IM = 1,000,000\Omega$ 

#### (7) DEFAULT CODE

Letter L is the system default code for ordering only.  $\ensuremath{^{\text{(Note)}}}$ 

#### **ORDERING EXAMPLE**

The ordering code for a RC0402 0.0625W chip resistor value  $100 \text{K}\Omega$  with  $\pm$  5% tolerance, supplied in 7-inch tape reel of 10,000 units per reel is: RC0402JR-07100KL.

#### NOTE

- 1. All our RSMD products meet RoHS compliant and Halogen Free. "LFP" of the internal 2D reel label mentions "Lead Free Process".
- 2. On customized label, "LFP" or specific symbol can be printed.

# **MARKING**

## RC0075 / RC0100 / RC0201 / RC0402

No Marking

Fig. I

#### RC0603

1%, 0.5%,E24 exception values 10/11/13/15/20/75 of E24 series

1%, 0.5%, E96 refer to EIA-96 marking method, including values 10/11/13/15/20/75 of E24 series

5%, E24 series: 3 digits

First two digits for significant figure and 3rd digit for number of zeros

# RC0805 / RC1206 / RC1210 / RC2010 / RC2512

1%, 0.5%, E24/E96 series : 4 digits

First three digits for significant figure and 4th digit for number of zeros

5%, E24 series: 3 digits

First two digits for significant figure and 3rd digit for number of zeros

#### RC1218

E-24 series: 3 digits, ±5%

First two digits for significant figure and 3rd digit for number of zeros

Both E-24 and E-96 series: 4 digits,  $\pm 1\%$  &  $\pm 0.5\%$ 

First three digits for significant figure and 4th digit for number of zeros

For further marking information, please see special data sheet "Chip resistors marking".

# **CONSTRUCTION**

The resistor is constructed on top of a high-grade ceramic body. Internal metal electrodes are added on each end to make the contacts to the thick film resistive element. The composition of the resistive element is a noble metal imbedded into a glass and covered by a second glass to prevent environmental influences. The resistor is laser trimmed to the rated resistance value. The resistor is covered with a protective epoxy coat, finally the two external terminations (matte tin on Ni-barrier) are added, as shown in Fig.9.

#### **Outlines**

#### NOTE

For tape and reel specification/dimensions, please refer to data sheet "Chip resistors packing".

## **FUNCTIONAL DESCRIPTION**

#### **OPERATING TEMPERATURE RANGE**

RC0402 to RC2512 Range: -55°C to +155°C (Fig. 10-1) RC0075 to RC0201 Range: -55°C to +125°C (Fig. 10-2)

## **POWER RATING**

Each type rated power at 70 °C:

RC0075=1/50W

RC0100=1/32W

RC0201=1/20W

RC0402=1/16W, 1/8W

RC0603=1/10W, 1/5W

RC0805=1/8W, 1/4W

RC1206=1/4W, 1/2W

RC1210=1/2W

RC1218=1W

RC2010=3/4W

RC2512=1W, 2W

#### **RATED VOLTAGE**

The DC or AC (rms) continuous working voltage corresponding to the rated power is determined by the following formula:

$$V = \sqrt{(PxR)}$$

or max. working voltage whichever is less

Where

V = Continuous rated DC or AC (rms) working voltage (V)

P = Rated power (W)

 $R = Resistance value (\Omega)$ 

# TESTS AND REQUIREMENTS

# Table 4 Test condition, procedure and requirements

| TEST                                  | TEST METHOD                               | PROCEDURE  | REQUIREMENTS   |
|---------------------------------------|---|--|--|
| Temperature Coefficient of Resistance | MIL-STD-202 Method 304                    | At +25/–55°C and +25/+125°C  | Refer to table 2   |
| (T.C.R.)                              |   | Formula:   |  |
|                                       |   | T.C.R= $\frac{R_2 - R_1}{R_1(t_2 - t_1)} \times 10^6 \text{ (ppm/°C)}$   |  |
|                                       |   | Where $t_1$ =+25 °C or specified room temperature  |  |
|                                       |   | $t_2$ =-55 °C or +125 °C test temperature  |  |
|                                       |   | $R_1$ =resistance at reference temperature in ohms $R_2$ =resistance at test temperature in ohms                             |  |

**REVISION HISTORY** 

| REVISION   | DATE          | CHANGE NOTIFICATION | DESCRIPTION  |
|------------|---------------|---------------------|--|
| Version 12 | Aug. 02, 2022 | -                   | - 12 dimension updated, for size 1206, size 2010, size 2512.                   |
| Version 11 | May 15, 2020  | -                   | - Extend RC0201, RC0402, RC0603, RC0805, RC1206 D tol resistance range to lohm |
| Version 10 | Dec. 12, 2018 | -                   | - Updated 0075 dimensions  |
| Version 9  | Mar. 06, 2018 | -                   | - Add 0.5%/1% marking rule for RC0603 ~ RC2512 based on marking datasheet      |
| Version 8  | July 10, 2017 | -                   | - Add "3W" part number coding for 13" Reel & double power                      |
| Version 7  | Mar. 7, 2017  | -                   | - Add 10" packing  |
| Version 6  | Feb.15, 2017  | -                   | - Extend RC0805 and RC1206 resistance range to 100Mohm                         |
| Version 5  | Oct. 06, 2016 | -                   | - Description: Update Dimension of I2 of RC2512 (2W)                           |
| Version 4  | Jan. 22, 2016 | -                   | - Update resistance range  |
| Version 3  | Dec. 24, 2015 | -                   | - Updated test and requirements  |
| Version 2  | Jul. 23, 2015 | -                   | - Updated test and requirements  |
| Version I  | Jan. 21, 2015 | -                   | - ESD Safe Reel update   |
| Version 0  | Dec. 15, 2014 | -                   | - First issue of this specification  |
|            |               |                     |  |

0075 to 2512

## LEGAL DISCLAIMER

YAGEO, its distributors and agents (collectively, "YAGEO"), hereby disclaims any and all liabilities for any errors, inaccuracies or incompleteness contained in any product related information, including but not limited to product specifications, datasheets, pictures and/or graphics. YAGEO may make changes, modifications and/or improvements to product related information at any time and without notice.

YAGEO makes no representation, warranty, and/or guarantee about the fitness of its products for any particular purpose or the continuing production of any of its products. To the maximum extent permitted by law, YAGEO disclaims (i) any and all liability arising out of the application or use of any YAGEO product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for a particular purpose, non -infringement and merchantability.

YAGEO products are designed for general purpose applications under normal operation and usage conditions. Please contact YAGEO for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property: Aerospace equipment (artificial satellite, rocket, etc.), Atomic energy-related equipment, Aviation equipment, Disaster prevention equipment, crime prevention equipment, Electric heating apparatus, burning equipment, Highly public information network equipment, data-processing equipment, Medical devices, Military equipment, Power generation control equipment, Safety equipment, Traffic signal equipment, Transportation equipment and Undersea equipment, or for any other application or use in which the failure of YAGEO products could result in personal injury or death, or serious property damage. Particularly YAGEO Corporation and its affiliates do not recommend the use of commercial or automotive grade products for high reliability applications or manned space flight.

Information provided here is intended to indicate product specifications only. YAGEO reserves all the rights for revising this content without further notification, as long as products are unchanged. Any product change will be announced by PCN.

# **X-ON Electronics**

Largest Supplier of Electrical and Electronic Components
